**QUESTION 1**

Which statement is true about the @PropertySource annotation? (Choose the best answer.)

- A. Used to designate the location of the application.properties file in a Spring Boot application.
- B. Used to easily look up and return a single property value from some external property file.
- C. Used to designate the file directory of the application.properties file in a Spring Boot application.
- D. Used to add a set of name/value pairs to the Spring Environment from an external source.

Correct Answer: B

QUESTION 2

Which two statements are true regarding the RestTemplate class? (Choose two.)

- A. It supports asynchronous non-blocking model.
- B. It automatically supports sending and receiving Java objects.
- C. It provides convenience methods for writing REST clients.
- D. It provides convenience methods for writing REST services.
- E. Sending an HTTP request with a custom header is not possible when using RestTemplate.

Correct Answer: BE

Reference: <https://docs.spring.io/spring-framework/docs/current/javadoc-api/org/springframework/web/client/RestTemplate.html>

QUESTION 3

Which two statements are true regarding Spring and Spring Boot Testing? (Choose two.)

- A. EasyMock is supported out of the box.
- B. @SpringBootTest or @SpringJUnitConfig can be used for creating an ApplicationContext.
- C. Mockito spy is not supported in Spring Boot testing by default.
- D. The spring-test dependency provides annotations such as @Mock and @MockBean.
- E. Integration and slice testing are both supported.

Correct Answer: CD

Reference: <https://docs.spring.io/spring-boot/docs/2.1.5.RELEASE/reference/html/boot-featurestesting.html>

QUESTION 4

Refer to the exhibit.

```
public interface CustomerRepository extends CrudRepository<Customer, Long>{  
}
```

Which statement is true? (Choose the best answer.)

- A. CustomerRepository should be a class, not an interface.
- B. JPA annotations are required on the Customer class to successfully use Spring Data JDBC.
- C. An implementation of this repository can be automatically generated by Spring Data JPA.
- D. A class that implements CustomerRepository must be implemented and declared as a Spring Bean.

Correct Answer: C

QUESTION 5

Which statement describes the @AfterReturning advice type? (Choose the best answer.)

- A. The advice is invoked only if the method returns successfully but not if it throws an exception.
- B. The @AfterReturning advice allows behavior to be added after a method returns even if it throws an exception.
- C. The advice has complete control over the method invocation; it could even prevent the method from being called at all.
- D. Typically used to prevent any exception, thrown by the advised method, from propagating up the call-stack.

Correct Answer: A
