**QUESTION 1**

Which statement is true about the @PropertySource annotation? (Choose the best answer.)

- A. Used to designate the location of the application.properties file in a Spring Boot application.
- B. Used to easily look up and return a single property value from some external property file.
- C. Used to designate the file directory of the application.properties file in a Spring Boot application.
- D. Used to add a set of name/value pairs to the Spring Environment from an external source.

Correct Answer: B

---

**QUESTION 2**

Refer to the exhibit.

```
@PutMapping("/accounts/{id}")  
public void update() {}
```

Which option is a valid way to retrieve the account id? (Choose the best answer.)

- A. Add @PathVariable("id") String accountId argument to the update() handler method.
- B. Add @PathVariable long accountId argument to the update() handler method.
- C. Add @RequestParam long accountId argument to the update() handler method.
- D. Add @RequestParam("id") String accountId argument to the update() handler method.

Correct Answer: A

Reference: <https://docs.spring.io/spring-framework/docs/4.3.12.RELEASE/spring-framework-reference/htmlsingle/>

---

**QUESTION 3**

Refer to the exhibit.

@Configuration

```
public class MyConfig {  
    @Bean  
    public AccountRepository accountRepository() {  
        return new JdbcAccountRepository() ;  
    }  
    @Bean  
    public TransferService transferService() {  
        TransferServiceImpl service = new TransferServiceImpl() ;  
        service.setAccountRepository(accountRepository());  
        return service;  
    }  
    @Bean  
    public AccountService accountService() {  
        return new AccountServiceImpl(accountRepository());  
    }  
}
```

Based on the default Spring behavior, choose the correct answer. (Choose the best answer.)

- A. One AccountRepository bean will be instantiated since the default scope is singleton.
- B. Three AccountRepository beans will be instantiated as the accountRepository() method will be called three times.
- C. Many AccountRepository beans will be instantiated, depending how often accountRepository(), transferService() and accountService() are called.
- D. Two AccountRepository beans will be instantiated as the accountRepository() method will be called two times.

Correct Answer: C

---

#### QUESTION 4

Which statement is true? (Choose the best answer.)

- A. @ActiveProfiles is a class-level annotation that is used to instruct the Spring TestContext Framework to record all application events that are published in the ApplicationContext during the execution of a single test.
- B. @ActiveProfiles is a class-level annotation that you can use to configure how the Spring TestContext Framework is bootstrapped.
- C. @ActiveProfiles is a class-level annotation that you can use to configure the locations of properties files and inlined properties to be added to the set of PropertySources in the Environment for an ApplicationContext loaded for an integration test.
- D. @ActiveProfiles is a class-level annotation that is used to declare which bean definition profiles should be active when loaded an ApplicationContext for an integration test.

Correct Answer: D

Reference: <https://docs.spring.io/spring-framework/docs/4.2.x/spring-framework-reference/html/integrationtesting.html>

---

#### QUESTION 5

Which two options will inject the value of the daily.limit system property? (Choose two.)

- A. @Value("#{daily.limit}")
- B. @Value("\${systemProperties.daily.limit}")
- C. @Value("\${daily.limit}")
- D. @Value("#{systemProperties['daily.limit']}")
- E. @Value("#{systemProperties.daily.limit}")

Correct Answer: BD
