---

#### QUESTION 4

A vRealize Automation administrator needs to allow users to revert their machines to their initial deployment state.

What should the administrator do?

- A. Enable the Reprovision option in the blueprint.
- B. Enable the Snapshot option in the blueprint.
- C. Enable the Linked Clone option in the blueprint.
- D. Enable the Destroy option in the blueprint.

Correct Answer: B

---

#### QUESTION 5

Which two options are supported for the IaaS database in a minimal deployment of vRealize Automation? (Choose two.)

- A. Microsoft SQL Server installed on the IaaS server
- B. Microsoft SQL Server installed on an external server
- C. PostgreSQL Server installed on an external server
- D. PostgreSQL Server installed on an IaaS server

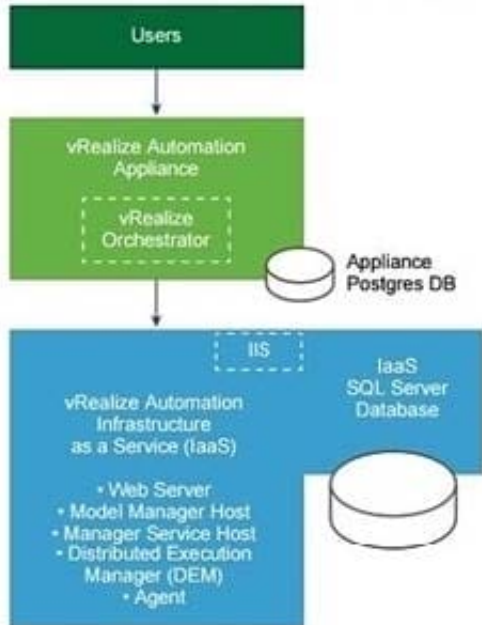

Correct Answer: AB

## Minimal vRealize Automation Deployments

Minimal deployments include one vRealize Automation appliance and one Windows server that hosts the IaaS components. In a minimal deployment, the vRealize Automation SQL Server database can be on the same IaaS Windows server with the IaaS components, or on a separate Windows server.

**Figure 1-1.** Minimal vRealize Automation Deployment
