**QUESTION 1**

A new catalog item was added to an existing service named DMZServers, but it is NOT appearing in the catalog. All of the other items in the service appear correctly.

Which of the following would explain this behavior?

- A. The entitlement needs to be reactivated.
- B. The catalog item still requires actions to be associated.
- C. The catalog items were assigned to the entitlement individually.
- D. There is an approval policy on the entitlement.

Correct Answer: C

---

**QUESTION 4**

An administrator powers on a vRealize Automation Multi-Machine Service that includes Machine A and Machine B. The application on Machine A does not start correctly and displays the following error message: Machine B not ready.

What step should be taken to resolve this issue?

- A. Change the startup order of the Multi-Machine Service.
- B. Create a startup dependency in the Multi-Machine Service.
- C. Define a startup delay in the Multi-Machine Service.
- D. Adjust the startup approvals for the Multi-Machine Service.

Correct Answer: B
