**QUESTION 1**

An organization has deployed a View environment. Users need to connect USB devices to their View sessions.

- All client endpoints are Windows 7 thin clients.
- A firewall is in place through which all network traffic flows.
- All Windows patches are up to date on guest virtual machines and endpoints.

Users report that USB devices are not connecting to the View sessions when they are plugged in to the thin clients.

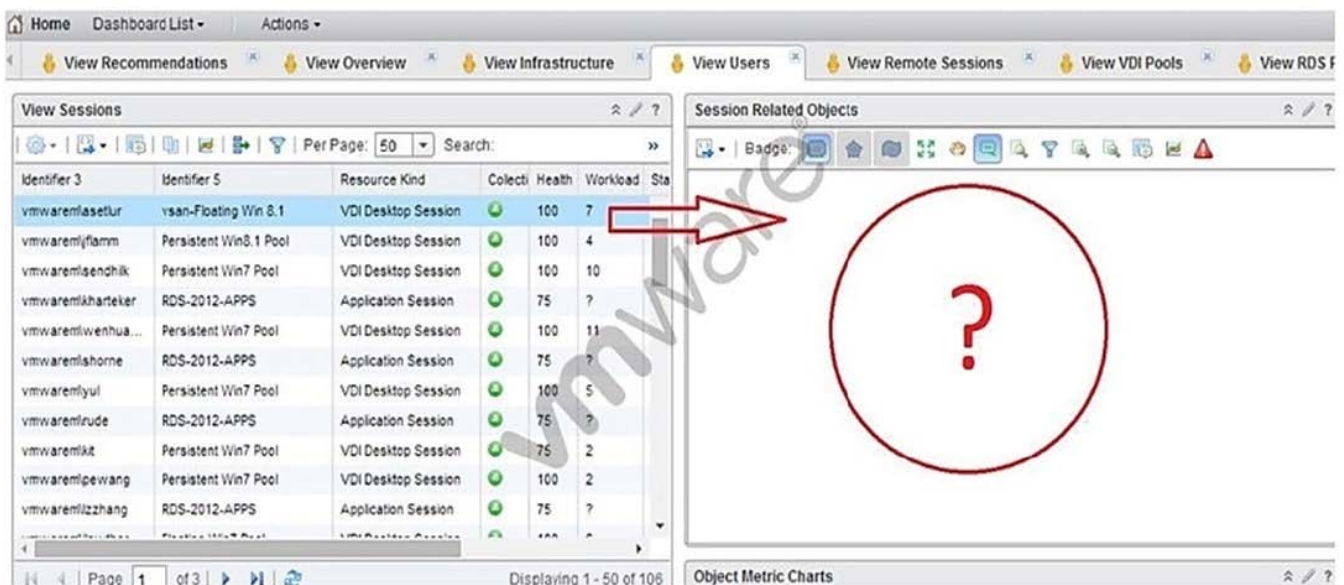

What are two reasons that could cause this behavior? (Choose two.)

- A. TCP port 9427 is closed on the firewall.
- B. TCP port 32111 is closed on the firewall.
- C. Windows Mobile Device Center is preventing USB redirection.
- D. USB redirection drivers on the guest virtual machine are missing or disabled.

Correct Answer: BD

QUESTION 2

Refer to the Exhibit. An administrator has successfully deployed vCenter Operations for Horizon. The administrator logs into the custom dashboard, finds a list of active users on the View Users tab, and clicks on one of them.

The Health tree widget does not update, as shown in the exhibit.

What has been changed in vCenter Operations for Horizon configuration to result in the dashboard issue?

- A. Interaction between the Active User Sessions widget and the Health tree widget was removed.
- B. Reporting in the Health tree widget was changed from on to off.
- C. Interaction between the Metric Sparkline widget and the Health tree widget was removed.
- D. Reporting in the Active User Sessions widget was changed from on to off.

Correct Answer: A

QUESTION 3

When configuring a Microsoft Windows 2012 R2 virtual machine as a single-session View desktop, what Microsoft Windows role or feature must be installed to access the desktop using HTML?

- A. Remote Access
- B. Desktop Experience
- C. Hyper-V
- D. Web Server (IIS)

Correct Answer: B

QUESTION 4

An administrator is planning a new pool for a group of users. The pool requirements are:

- User data must be portable between desktops.
- User-installed applications must persist between sessions.
- SE Sparse disk will be used to reclaim storage capacity.
- Linked-clones will be used to conserve storage capacity.
- Desktops will be refreshed on log off.

The administrator plans to use View Composer persistent disks to support the requirements for this pool. Which requirement will prevent the use of View Composer persistent disks?

- A. User data must be portable between desktops.
- B. User-installed applications must persist between sessions.
- C. SE Sparse disk will be used to reclaim storage capacity.
- D. Linked-clones will be used to conserve storage capacity.

Correct Answer: B

QUESTION 5

View Composer supports which database version?

- A. vPostgres
- B. Microsoft SQL Server 2008 SP1
- C. Oracle 11g
- D. Microsoft SQL Server 2012

Correct Answer: D
