**QUESTION 1**

Exhibit:

```
global policy:
service-policy: global_policy
class-map: sfr
SFR: card status up, mode fail-open
packet input 2055480364, packet output 2055488190, drop 13990, reset-drop 0
```

Which configuration blow would result in this output of the show service-policy sfr command?

- A. policy-map global\_policy class inspection\_default class sfr sfr fail-open
- B. policy-map global\_policy class inspection\_default class sfr sfr fail-close
- C. policy-map global\_policy class inspection\_default class sfr sfr fail-open monitor-only
- D. policy-map global\_policy class inspection\_default class sfr sfr fail-close monitor-only

Correct Answer: C

---

**QUESTION 2**

Which statement about Cisco ASA multicast routing support is true?

- A. The Cisco ASA appliance supports PIM dense mode, sparse mode, and BIDIR-PIM.
- B. The Cisco ASA appliance supports only stub multicast routing by forwarding IGMP messages from multicast receivers to the upstream multicast router.
- C. The Cisco ASA appliance supports DVMRP and PIM.
- D. The Cisco ASA appliance supports either stub multicast routing or PIM, but both cannot be enabled at the same time.
- E. The Cisco ASA appliance supports only IGMP v1.

Correct Answer: D

---

**QUESTION 3**

**Scenario**

In this simulation, you have access to the mail flow policies and sender groups configured on a Cisco Email Security Appliance. You are also provided the following list of fictional domains. SenderBase has records for one sender from each of these domains. The list provides the domain name and the SenderBase Reputation Score for the domain's sender.

red.public, -6  
orange.public, -4  
yellow.public, -2  
green.public, 2  
blue.public, 6  
violet.public, 8

Your task is to review the configuration on the Cisco Email Security Appliance, and then answer **four** multiple choice questions about the behavior of the Cisco Email Security Appliance given the configuration and the domain SenderBase Reputation Scores.

**Instructions**

Access the configuration of the Cisco Email Security Appliance using the MailFlowPolicies tab. Within the GUI, you can navigate between the Host Access Table Overview and Mail Flow Policies tables. You can also navigate to the individual Mail Flow Policies and Sender Groups that are configured on the appliance.

Consider the configuration and the SenderBase Reputation Scores of the following fictitious domains when answering the 5 multiple choice questions.

- red.public, -6
- orange.public, -4
- yellow.public, -2
- green.public, 2
- blue.public, 6
- violet.public, 8

**THIS TASK DOES NOT REQUIRE DEVICE CONFIGURATION.**  
Click on the MailFlowPolicies tab to access the device configuration.  
To access the multiple-choice questions, click on the numbered boxes on the left of the top panel.  
There are four multiple-choice questions with this task. Be sure to answer all four questions before selecting the Next button.

The screenshot shows the 'Mail Flow Policies' configuration page. At the top, there are tabs for Monitor, Mail Policies, Security Services, Network, and System Administration. The 'Mail Policies' tab is selected. Below the tabs, there is a section for 'Policies (Listener: IncomingMail 172.16.16.25:25)'. There is an 'Add Policy...' button. Below this is a table with columns for Policy Name, Behavior, and Delete. The table contains the following rows:

Policy Name	Behavior	Delete
ACCEPTED	Accept	?
BLOCKED	Reject	?
RELAYED	Relay	?
THROTTLED	Accept	?
TRUSTED	Accept	?

Below the table is a section for 'Default Policy Parameters'.

What is the maximum number of recipients per hour that the Cisco Email Security Appliance will accept from the green.public domain?

- A. 0
- B. 1

- C. 20
- D. 25
- E. 50
- F. 5000
- G. Unlimited

Correct Answer: C

---

#### QUESTION 4

What are three benefits of the Cisco AnyConnect Secure Mobility Solution? (Choose three.)

- A. It can protect against command-injection and directory-traversal attacks.
- B. It provides Internet transport while maintaining corporate security policies.
- C. It provides secure remote access to managed computers.
- D. It provides clientless remote access to multiple network-based systems.
- E. It enforces security policies, regardless of the user location.
- F. It uses ACLs to determine best-route connections for clients in a secure environment.

Correct Answer: BCE

---

#### QUESTION 5

Which action is possible when a signature is triggered on the Cisco IOS IPS?

- A. Deny all packets with the same source address
- B. Send an email via SMTP to the administrator Deny all packets with the same port destination Send an SNMP alert to a monitoring system

Correct Answer: A
