**QUESTION 3**

Which customizable security report on Cisco Prime Infrastructure would show rogue APs detected since a point in time?

- A. New Rogue APs
- B. Rogue AP Events
- C. Rogue APs
- D. Rogue AP Count Summary

Correct Answer: C

---

Prime Infrastructure gets updates about rogues from controllers by using traps or by polling. The Last Seen Time is updated any time a trap for the rogue is received or rogue is seen during the last Prime Infrastructure polling cycles.

This report displays all rogues detected by the access points in your network based on the Last Seen Time of the rogue access points and the selected filtering criteria. The report lists rogue access points based on the time they were last seen.

Note: The report includes rogue access point alarms with clear severity.
