QUESTION 1

Refer to the exhibit.

```
Fabric ID: B
   Path ID: 1
      VIF    vNIC    Link State    Oper State    Prot State      Prot Role     Admin Pin    Oper Pin    Transport
      ---    ----    ----------    ----------    ----------      ---------     ---------    --------    ---------
      795    eth0    Up            Active        Passive         Backup        0/0          0/8         Ether
      799    eth2    Up            Active        Active          Backup        0/0          0/11        Ether
      800    eth3    Up            Active        Active          Primary       0/0          0/8         Ether
      802    eth1    Up            Active        No protection   Unprotected   0/0          0/1         Ether
      806    fc1     Up            Active        No protection   Unprotected   0/0          2/1         Fc
      8997           Error         Error                                       0/0          0/0         Ether
      9303 |         Up            Active        No protection   Unprotected   0/0          0/0         Ether
```

Cisco UCS Fabric interconnect A and B have identical uplink configurations. Which option describes the problem of Fabric interconnect A?

A. Ethernet0/11 on Fabric interconnect A is down.

B. The IOM on Fabric interconnect A was rebooted.

C. FC2/1 on Fabric interconnect A is unplugged or has been replaced with a GLC-T.

D. Fabric interconnect A is powered off.

Correct Answer: C

QUESTION 2

A Cisco UCS Director administrator is installing a Bare Metal Agent and is in the process of adding an NFS mount point. Which Administration menu option does the administrator choose to add an NFS mount point?

A. Compute Accounts

B. Storage Accounts

C. Physical Accounts

D. Bare Metal Accounts

Correct Answer: C

QUESTION 3

In Cisco UCSM, which two options describe the purpose of a service profile template? (Choose two.)

A. With a service profile template, you can quickly create several service profiles with the same basic parameters, such as the number of vNICs and vHBAs, and with identify information drawn from the same pools.

B. A service profile template parameterizes the UIDs that differentiate one instance of an otherwise identical server from another. Templates can be categorized into two types: initial and updating.

C. When using an initial service profile template, changes to the initial template automatically propagate to the bound service profiles.

D. Service profiles created from an updating service profile template do not inherit all the properties of the template and remain connected to the template. Any changes to the template must be propagated manually to the service profiles that are created from the template.

Correct Answer: AB

QUESTION 4

You have been asked to configure a virtual fiber channel interface. Which information is needed to complete this task?

A. Fibre Channel ID and VSAN database key

B. VSAN ID and Fibre Channel interface

C. active zoneset and VSAN ID

D. VLAN ID, VSAN ID, and Ethernet interface number

Correct Answer: B

QUESTION 5

A Cisco UCS Director administrator is changing the boot order in a boot policy. Which option lists the steps that accomplish this task?

A. On the menu bar, choose Physical > Storage. In the left pane, expand the pod and then click the Cisco UCS Manager account. In the right pane, click the Organizations tab. Click the organization in which you want to modify a policy and then click View Details. Click the Manage Boot Order tab. Choose the boot policy that you want to clone and click Manage Boot Order.

B. On the menu bar, choose Physical > Compute. In the left pane, expand the pod and then click the Cisco UCS Manager account. In the right pane, click the Organizations tab. Click the organization in which you want to modify a policy and then click View Details. Click the Boot Policies tab. Choose the boot policy that you want to clone and click Manage Boot Devices Order.

C. On the menu bar, choose Physical > Storage. In the left pane, expand the pod and then click the Cisco UCS Manager account. In the right pane, click the Organizations tab. Click the organization in which you want to modify a policy and then click View Details. Click the Boot Policies tab. Choose the boot policy that you want to clone and click Manage Boot Devices Order.

D. On the menu bar, choose Physical > Compute. In the left pane, expand the pod and then click the Cisco UCS Manager account. In the right pane, click the Organizations tab. Click the organization in which you want to modify a policy and then click View Details. Click the Manage Boot Order tab. Choose the boot policy that you want to clone and click Manage Boot Order.

Correct Answer: A
