QUESTION 1

What is the role of the NSO ConfD engine for network applications that are deployed in multivendor environments?

A. ConfD provides a repository for configurations that are used in automated provisioning of devices after they are powered on.

B. ConfD automatically generates network configurations based on network service definitions.

C. ConfD maintains a database that represents the operational state of a network and provides YANG-based management interfaces for use by external systems.

D. ConfD provides a library of common configuration tasks that can be quickly adapted for use on a variety of multivendor devices.

Correct Answer: C

QUESTION 2

YANG modeling supports which two comment styles? (Choose two.)

A. A block comment is enclosed within "".

B. A single-line comment starts with "#" and ends at the end of the line.

C. A single-line comment starts with "!" and ends at the end of the line.

D. A block comment is enclosed within "/*" and "*/".

E. A single-line comment starts with "//" and ends at the end of the line.

Correct Answer: DE

Comments are C++ style. A single line comment starts with "//" and ends at the end of the line. A block comment is enclosed within "/*" and "*/".
