**QUESTION 1**

A customer has a collaboration solution on-premises and is considering a cloud solution for the enterprise. Which collaboration method should be deployed to protect the existing investment and extend collaboration to the cloud?

- A. Continue to use the on-premises solution and add a cloud solution in parallel.
- B. Refresh hardware and software with the latest releases.
- C. Decommission on-premises equipment and flash cut to a cloud solution.
- D. Move to a hybrid that integrates an existing solution with a cloud solution.

Correct Answer: D

QUESTION 2

In the Cisco TMS GUI, a Cisco UCM registered system shows these error details:

Provisioning mode is set to Cisco UCM for this system.

The system cannot be refreshed or scheduled.

To manage this system as a Cisco TMS system, the provisioning mode needs to be changed to Cisco TMS.

To add the system as Cisco UCM managed system, it must be added through the Cisco UCM that is provisioning the system.

What should be done to resolve this error?

- A. Purge the system in Cisco TMS and add the system back directly to Cisco TMS using "Add by IP Address".
- B. Restart Microsoft IIS on the Windows server that hosts Cisco TMS and perform a "Force Refresh" on the system.
- C. Delete the system and add the system back with the "Add from Cisco UCM or Cisco TMS" option.
- D. Update the credentials for the system in Cisco TMS.

Correct Answer: C

QUESTION 3

An engineer configures Cisco Meeting Server with Expressway for external web app access and must enable participants to use the web app to join conferences that are hosted on the meeting server. Which service should be used in the Expressway-E accomplish this goal?

- A. Cisco Meeting Server

- B. SIP
- C. XMPP server
- D. TURN

Correct Answer: D
