**QUESTION 1**

Which two statements about Managed Bandwidth are true? (Choose two.)

- A. If the Managed Bandwidth field is blank for a location no Call Admission Control is done for that location.
- B. If the Managed Bandwidth field has a value. Session Manager keeps track of the bandwidth in use based on the calls coming out of and going to that specific location and denies new calls when the bandwidth in use reaches the limit.
- C. If the Managed Bandwidth field is blank for a location, the default Call Admission Control is done for that location. Session Manager keeps track of the bandwidth in use based on the calls coming out of and going to that specific location and denies new calls when the bandwidth in use reaches the limit.
- D. If the Managed Bandwidth field has a value. Session Manager keeps track of the bandwidth in use based on the calls coming out of and going to that specific location and drops old calls when the bandwidth in use reaches the limit.
- E. If the Managed Bandwidth field has a value, Session Manager keeps track of the bandwidth in use based on the calls coming out of and going to that specific location and sends an alarm to an administrator when new calls reach the bandwidth the limit.

Correct Answer: AB

---

**QUESTION 2**

Which two statements describe the purpose of a System Manager (SMGR) role? (Choose two.)

- A. It provides access to any number of resources managed by SMGR.
- B. It impacts the originating and terminating applications that can be sequenced for a user.
- C. It is automatically held by users that have been added to any group containing that role.
- D. It can be held by multiple administrators at the same time and a single administrator can have multiple roles enabling tight control of access.

Correct Answer: AD

---

**QUESTION 3**

A System Manager (SMGR) product administrator needs to perform some routine maintenance on an Avaya product in their network. Although they can successfully log in to SMGR, they do not have access to the menu they require in the navigation panel.

Which action must be taken?

- A. Make sure that the administrator has been assigned to a suitable group.
- B. Make sure that the administrator is not logged in at a different browser.

C. Ensure that the administrator's authentication type is set to 'enterprise' so that SMGR can retrieve permissions from the active directory server.

D. Check that the administrator has been assigned an appropriate role.

Correct Answer: D

---

#### QUESTION 4

What is the outcome of running SMnetsetup on a server that has an existing installation of session manager 601?

A. The network and date/time is configured on the server.

B. A System Manager System administrator login will be created.

C. The same version of the Session Manager software currently Installed is re-installed?

D. The current version of the Session Manager software is upgraded.

Correct Answer: A

---

#### QUESTION 5

After a power failure or database crash, the Postgres database may become corrupted and the Postgres server may not restart. The recovery action is to clear the writer-Ahead Log (WAL) and optionally reset other control data, using which command?

A. pg\_resetxlog

B. pg\_clearwal

C. pg\_dump

D. service postgresq1 restart

E. service wall restart

Correct Answer: A

---
