QUESTION 1

Greg calls Judy, who is not available. The call is transferred to an application server (named App1). App1 handles the call where a call answer message was recorded. The network connectivity to the storage server is lost and Judy logs into another application server in the cluster (App2). What is the expected outcome?

- A. Judy logs in successfully but is informed that the system is in offline mode, and cannot listen the new message that was left by Greg.
- B. Judy logs in successfully but is informed that the system is in offline mode. She is still able to listen to the latest message that was recorded by Greg.
- C. Judy's login is not successful as her password cannot be validated as the system is in offline mode.
- D. Judy can retrieve the new message if she logs into App1 but not when she logs into App2.

Correct Answer: D

QUESTION 2

What are two ways to delete a user from Avaya Aura Messaging 6.1 system? (Choose two.)

- A. In the User Report screen, enter the user's mailbox number in the Identifier field then the Delete button.
- B. In the User Management screen, enter the user's mailbox number in the Identifier field the Edit button; then select the Delete button.
- C. In the Users > Reports screen, select the respective row that has the user mailbox and Delete button on that row.
- D. In the Users > Reports screen, select the user's mailbox number link and then select the button in the next screen.

Correct Answer: BD

QUESTION 3

In which screen would you look to see which Communication Manager, System Platform and Avaya Aura Messaging (AAM) service packs are currently available and active on the messaging system?

- A. Open the System Management Interface and navigate to Messaging Administration > Server Maintenance > Server Configuration > Display Server configuration.
- B. Open the System Management Interface and navigate to Messaging Administration > Messaging > Reports > System Evaluation.
- C. Open the cdom and navigate to Server Management Patch Management > Manage.
- D. Open the cdom and navigate to Server Management > System Configuration.

Correct Answer: C

**QUESTION 4**

While configuring Avaya Aura Messaging 6.x for SIP Integration, we can provide a list of servers with which it can integrate. When the Messaging Server places an outgoing call, which server in the list would it use to send the call?

- A. the first Trusted Host server
- B. the same server which received the incoming request
- C. the first server that accepts the connection in the order listed on the Telephony integration screen
- D. The Server to which messaging has the shortest route

Correct Answer: C

QUESTION 5

You are performing an installation which includes three application servers and one storage server. You complete the administration of one application server to include integration with the telephony server. You then backup the application server. To save time; you restore this backup to the remaining two application servers. After completing the Installation, you notice that only the first application server receiving calls. The System Status (Application/AxC) page shows the AxC status as online for each application server and the Voice Messaging Application on each is running. Why is only the first server receiving calls?

- A. You did not cluster the application servers.
- B. The license files on the non-answering servers are incorrect.
- C. You still need to add trusted servers (on the storage server) for the remaining two application servers.
- D. You must complete the telephony integration for the remaining two application servers because this data is not included in the backup.

Correct Answer: D
