- B. Retrieve the software from the Avaya RFA (Remote Feature Activation) Web site.

- C. Place a call to the Avaya support help desk to request a copy of the software be shipped or downloaded to you.
- D. Log in and download the software from the Avaya Product Licensing and Delivery System (PLDS) Web site.
- E. Instruct the customer that they are required to contact their Avaya sales support executive or Avaya Business Partner to obtain a copy of the required software.

Correct Answer: AD

QUESTION 4

What are two accurate statements regarding the safety requirements for installing the Avaya Aura Messaging server into the rack? (Choose two.)

- A. Verify that the rack is level and stable before extending the server from the rack.
- B. Verify that the total AC supply branch circuit that supplies power to the rack does not exceed the branch circuit rating.
- C. Make sure to leave open space above and below your installed server to ensure proper air circulation.
- D. When installing a high capacity server which contains multiple power supplies you must install the cable management arm.

Correct Answer: AB

QUESTION 5

You are using the server console to install System Platform software on an Avaya Aura Messaging server. You have turned on the server. Inserted the DVD software into the DVD drive, and the Avaya screen is displayed. After about 30 seconds the system displays a "waiting for Telnet connection" message and the installation process halts. Which process will allow you to continue using the server console to complete the installation?

- A. Eject the DVD from the server and verify you have the correct software.
- B. Insert the System Platform DVD again and wait three minutes for the installation to continue.
- C. Reset the server to restart the installation. Within 30 seconds of the system displaying the Avaya screen, press Enter or type "vspmediacheck" to verify the image on the DVD is not corrupt.
- D. Disable Telnet services by entering the command "disable telnet" then reset the server.
- E. The server console cannot be used for installation of System Platform software. You must establish a Telnet/SSH session from your laptop to continue the installation.

Correct Answer: C
