**QUESTION 1**

During the installation of the Avaya Aura Messaging template file, you are promoted to enter a value for the "MSG IPv6 Address". The customer states that they are starting to convert to IPv6 addressing but did not supply an IP address for this entry. How should this server request be handled?

- A. Do not enter a value for IPv6; Avaya Aura Messaging does not currently support IPv6 addressing.
- B. Enter the IPv4 address you have been provided followed by ".0.0".
- C. Enter the word "disable" in the field as this option is not currently being used.
- D. Request an IPv6 address from the customer, and enter that address in the field.

Correct Answer: A

QUESTION 2

An end user has a completely functional mailbox but complains that when using Notify Me to phone is configured with a long distance number, calls are not received. The user is one of the groups of users with this problem. Other users can use long distance numbers for their Notify Me to Phone number successfully. Your testing reveals that the problem is exactly as described using the same long distance number; one user successfully uses Notify Me to Phone and a non working user cannot. What is causing the problem?

- A. The non working users class of service does not allow long distance dialing from the system.
- B. The non working users mailbox configuration is set to disallow long distance dialing from system.
- C. Dialing rules have been configured incorrectly for the system.
- D. The non working users do not have extensions that are configured in the switch.

Correct Answer: A

QUESTION 3

A customer has reported that an employee attempted to send a voice message to the entire Marketing team, but was unsuccessful, the customer reports that they successfully send messages to the team regularly. Why is this particular employee having problems?

- A. The employee is not a member of the Marketing Enhanced List.
- B. The employee's Class of Service (CoS) does not allow messages to be sent using the enhanced List
- C. Only the owner of the list is allowed to send messages using the Enhanced list; the employee not the owner.
- D. Only "Executive" CoS is allowed to send messages using the Enhanced list.

Correct Answer: B

QUESTION 4

During the installation of the Avaya Aura Messaging template file, you are promoted to enter a value for the "MSG IPv6 Address". The customer states that they are starting to convert to IPv6 addressing but did not supply an IP address for this entry. How should this server request be handled?

- A. Do not enter a value for IPv6; Avaya Aura Messaging does not currently support IPv6 addressing.
- B. Enter the IPv4 address you have been provided followed by ".0.0".
- C. Enter the word "disable" in the field as this option is not currently being used.
- D. Request an IPv6 address from the customer, and enter that address in the field.

Correct Answer: A

QUESTION 5

A system administrator is concerned over the number of simultaneous SMTP sessions on their Messaging Server. Which report would show the administrator the maximum simultaneous SMTP sessions by hour?

- A. IMAP/SMTP Traffic report
- B. Internet Messaging report
- C. System Evaluation report
- D. SMTP Snapshot

Correct Answer: A
