**QUESTION 1**

A network engineer is deciding whether to use stateful or stateless failover when configuring two ASAs for high availability. What is the connection status in both cases?

- A. need to be reestablished with stateful failover and preserved with stateless failover
- B. preserved with stateful failover and need to be reestablished with stateless failover
- C. preserved with both stateful and stateless failover
- D. need to be reestablished with both stateful and stateless failover

Correct Answer: B

---

**QUESTION 2**

Which two endpoint measures are used to minimize the chances of falling victim to phishing and social engineering attacks? (Choose two)

- A. Patch for cross-site scripting.
- B. Perform backups to the private cloud.
- C. Protect against input validation and character escapes in the endpoint.
- D. Install a spam and virus email filter.
- E. Protect systems with an up-to-date antimalware program

Correct Answer: DE

Phishing attacks are the practice of sending fraudulent communications that appear to come from a reputable source. It is usually done through email. The goal is to steal sensitive data like credit card and login information, or to install malware on the victim's machine.

---

**QUESTION 3**

Which Cisco Advanced Malware protection for Endpoints deployment architecture is designed to keep data within a network perimeter?

- A. cloud web services
- B. network AMP
- C. private cloud
- D. public cloud

Correct Answer: C

---

#### QUESTION 4

What is a characteristic of a bridge group in ASA Firewall transparent mode?

- A. It includes multiple interfaces and access rules between interfaces are customizable
- B. It is a Layer 3 segment and includes one port and customizable access rules
- C. It allows ARP traffic with a single access rule
- D. It has an IP address on its BVI interface and is used for management traffic

Correct Answer: A

Reference:

<https://www.cisco.com/c/en/us/td/docs/security/asa/asa95/configuration/general/asa-95-generalconfig/intro-fw.html>

Note: BVI interface is not used for management purpose. But we can add a separate Management slot/port interface that is not part of any bridge group, and that allows only management traffic to the ASA.

---

#### QUESTION 5

What is a capability of Cisco ASA Netflow?

- A. It filters NSEL events based on traffic
- B. It generates NSEL events even if the MPF is not configured
- C. It logs all event types only to the same collector
- D. It sends NetFlow data records from active and standby ASAs in an active standby failover pair

Correct Answer: A
