**QUESTION 1**

What are two functions of Cisco Expressway in the Collaboration Edge? (Choose two)

- A. Expressway-E provides a VPN entry point for Cisco IP phones with a Cisco AnyConnect client using authentication based on certificates.
- B. Expressway-C provides encryption for Mobile and Remote Access but not for business-to-business communications.
- C. The Expressway-C and Expressway-E pair can interconnect H 323-to-SIP calls for voice.
- D. The Expressway-C and Expressway-E pair can enable connectivity from the corporate network to the PSTN via a T1/E1 trunk.
- E. Expressway-E provides a perimeter network that separates the enterprise network from the Internet.

Correct Answer: CE

**QUESTION 2**

An administrator must implement toll fraud prevention on cisco UCM using these parameters:

1.

Enable Forced Authorization Code 112211.

2.

Set an authorization level of 3 for the route pattern 8005551212.

3.

Require no access code to dial 10-digit numbers.

How must the route pattern be implemented?

- A. Pattern = 3.800xxxxxx
- B. Pattern = 8005551212.1122113
- C. Pattern = 8005xxxxxx
- D. Pattern = 1122113.8005551212

Correct Answer: C

nothing special has to be done on the route pattern beside checking the Require Forced Authorization Code checkbox <https://www.cisco.com/c/en/us/support/docs/voice-unified-communications/unified-communications-manager-callmanager/81541-fac-config-ex.html>

**QUESTION 3**

Where is urgent priority enabled to bypass the T302 timer?

- A. route partition
- B. CTI port
- C. directory number
- D. transformation pattern

Correct Answer: C

Urgent priority is enabled on the directory number configuration page. This allows the call to be routed at once to the fully qualified DN without any necessity to wait for inter-digit-timeout. If the Urgent Priority checkbox is disabled and you have overlap patterns configured, then CUCM waits for the user to dial further digits.

The other options are incorrect because:

Route partitions are used to group route patterns and route lists. Transformation patterns are used to convert dialed digits into a different format. CTI ports are used to connect Cisco Unified Communications Manager to third-party applications.

**QUESTION 4**

Which option must be used when configuring the Local Gateway for a Cisco Webex Calling trunk?

- A. local authentication
- B. certificate-based
- C. mutual TLS
- D. Auth-based

Correct Answer: B

A certificate-based trunk is a type of trunk that uses certificates to authenticate the connection between Webex Calling and the Local Gateway

1.

A Local Gateway is a supported session border controller that terminates the trunk on the premises

2.

A certificate-based trunk requires a certificate authority (CA) to issue and manage the certificates for both Webex

Calling and the Local Gateway

---

#### QUESTION 5

Which design restriction applies to Cisco Unified Communications Manager Session Management Edition clustering over the WAN deployment with extended round-trip times in Cisco Unified CM 9.1 and later releases?

- A. SIP and H.323 intercluster trunks are supported.
- B. Only SIP trunk is supported.
- C. SIP trunks and H.323 gateways are supported.
- D. A minimum of 1.544 Mb/s bandwidth is required for all traffic between any two nodes in the cluster.
- E. Only RSVP agents can be configured and registered to the SME cluster as media resources.

Correct Answer: B
