QUESTION 1

What is the purpose of EIGRP summary leaking?

A. to allow a summary to be advertised conditionally on specific criteria

B. to allow a component of a summary to be advertised in addition to the summary

C. to allow overlapping summaries to exist on a single interface

D. to modify the metric of the summary based on which components of the summary are operational

Correct Answer: B

When you do manual summarization, and still you want to advertise some specific routes to the neighbor, you can do that using leak-map. Please read more about leaking routes here.

QUESTION 2

Which three protocols can use enhanced object tracking? (Choose three.)

A. HSRP

B. Proxy-ARP

C. VRRP

D. GLBP

E. NTP

F. DHCP

Correct Answer: ACD

The Enhanced Object Tracking feature separates the tracking mechanism from HSRP and creates a separate standalone tracking process that can be used by other processes and HSRP. This feature allows tracking of other objects in addition to the interface line-protocol state. A client process such as HSRP, Virtual Router Redundancy Protocol (VRRP), or Gateway Load Balancing Protocol (GLBP), can register its interest in tracking objects and then be notified when the tracked object changes state.
