- **365 Days** Free Update
- **800,000+** Satisfied Customers

QUESTION 1

A customer requests a conceptual design for the Cloud Management solution.

What three selections represent a conceptual design? (Choose three.)

A. Cloud Automation

B. Identity Management

C. vRealize Automation

D. Workspace One Access

E. Monitoring and Logging

F. vRealize Log Insight

Correct Answer: ABE

QUESTION 2

An architect is designing a vRealize Log Insight cluster for an organization. The organization has the following requirements:

No requirement for archival data Support a log data retention period of 14 days

How will the log data be handled in this vRealize Log Insight cluster after the 14-day retention period?

A. The user needs to manually select and delete specific old log messages to free up space.

B. Old log messages are automatically and periodically retired on least accessed basis.

C. Old log messages are automatically and periodically retired on a first-come-first-retired basis.

D. A variable sized chunk of old log messages is deleted to free up space based on the data age basis.

Correct Answer: D

QUESTION 3

A customer is deploying vRealize Log Insight (vRLI) in their data centers. The customer has the following:

Three data centers in three geographical locations.

Each site has 1000 logging sources that send events to vRLI.

The customer has the following requirements:

Minimize the resources footprint in the management cluster where vRLI will be deployed.

vRLI must be highly available with no single points of failure.

Logs collected from any data center must be protected against site failure.

Which three design decisions would the architect choose to achieve the requirements? (Choose three.)

A. Configure logs forwarding from all data centers to a specific data center.

B. Configure filters to eliminate forwarding loops between vRLI clusters.

C. Configure logs forwarding from each data center to another one.

D. Deploy nine vRLI "Medium" nodes in a single cluster in each data center.

E. Configure filters to forward critical logs to central vRLI cluster.

F. Deploy four vRLI "Large" nodes in a single cluster in each data center.

Correct Answer: ADE

QUESTION 4

An online retail company needs its shopping cart application to be highly available.

What three cloud management design decisions would give an optimal shopping experience? (Choose three.)

A. Create a vRealize Operations metric chart for the application\\'s CPU usage

B. Create a vRealize Orchestrator workflow that remediates the issue by updating the CPU

C. Configure the vRealize Operations alert to run a vRealize Orchestrator workflow when triggered

D. Create a vRealize Operations alert that is triggered when the application\\'s CPU usage exceeds a threshold

E. Create a vRealize Orchestrator workflow that emails an administrator to remediate the issue

F. Configure the vRealize Operations alert to email an administrator to remediate the issue

Correct Answer: BDF

QUESTION 5

An architect is completing the physical design for a vRealize Operation (vROps) solution for a customer. The customer has only provided the following information for their existing environment:

500 Virtual Machines 2 VMware vCenter Servers 10 VMware vSphere Horsts 20 Datastores Live data should be stored within the vROps solution for 6 months The RTO for all existing management components is 4 hours The RTO for all existing management components is 1 hour

Which two assumptions could the architect make when sizing the vROps cluster? (Choose two.)

A. The vROps cluster will be configured as High Availability.

B. The RTO of the vROps solution will be 4 hours.

C. The resource profile of a virtual machine will be, on average, 1 vCPU and 2 GB RAM.

D. The minimum data retention within vRealize Operations Cluster will be 12 months.

E. The RPO of the vROps solution will be 1 hour.

Correct Answer: AB
