**QUESTION 1**

An architect is responsible for designing a new Operations Management solution for a customer. The customer has provided the following information about their existing VMware Software Defined Data Center (SDDC) environment:

The customer uses a SaaS-Based Service Desk solution.

The existing environment is located across two geographical regions.

In each region, the customer already has deployed a vSphere-based virtual environment that spans two well connected physical locations.

The customer has recently upgraded all of their licenses to VMware vCloud Suite Advanced subscription.

The customer has already successfully deployed and configured a vRealize Operations 8 solution in each region.

The customer would like to ensure that:

All vSphere log events must be captured, stored locally and forwarded to a third-party log management solution to ensure regulatory compliance.

Specific vSphere log events can be captured within a region, monitored and then trigger alerts direct to the Service Desk which can then be assigned to regional support teams.

Operations monitoring for all of the VMware SDDC solution can be consolidated into a single user interface.

Which three recommendations should the architect make to meet the requirements? (Choose three.)

- A. Configure vRealize Operations 8.x and vRealize Log Insight 8.x integration.
- B. Configure vRealize Operations 8.x and vRealize Log Insight Cloud integration.
- C. Deploy vRealize Operations Cloud and configure Federated Analytics.
- D. Deploy vRealize Log Insight 8.x and configure the vSphere integration.
- E. Deploy vRealize Log Insight Cloud and configure the vSphere integration.
- F. Deploy vRealize Operations Cloud and vRealize Log Insight 8.x integration.

Correct Answer: BDE

QUESTION 2

An architect has designed a vRealize Log Insight (vRLI) cluster for an organization. Details of the cluster are provided below:

3-node vRealize Log Insight cluster to collect logs for an organization NFS storage is enabled for archival data Once the NFS storage is full, which will be the resulting scenario?

- A. vRLI will stop ingesting new data and unless free space is available, loss of data will occur.
- B. vRLI will automatically delete the oldest archived logs, resulting in archived data loss.
- C. vRLI will further compress the active logs to make more space available in NFS storage.
- D. vRLI will send a notification and automatically disable log archiving.

Correct Answer: A

QUESTION 3

An architect has been asked about migrating a client's vRealize Automation solution from version 7.x to version 8.x. One of the requirements is to continue to support custom XaaS (Anything as a Service) blueprints that the client has developed.

Which component of a vRealize Automation logical design will fulfill this requirement?

- A. Cloud Assembly
- B. Cloud Zones
- C. Service Broker
- D. Cloud-Init

Correct Answer: B

QUESTION 4

Consider the following requirements to be used in determining a vRealize Operations licensing model:

Authentication provided by Single Sign On Performance monitoring and analytics for 12 Hosts and 1 vCenter vSphere security and compliance monitoring for PCI and HIPAA Guided remediation for discovered issues Customizable dashboards, reports and views

Using the requirements, what is the minimum license that can be used for this deployment of vRealize Operations?

- A. vRealize Cloud Universal Enterprise
- B. Advanced
- C. Standard
- D. Enterprise

Correct Answer: B

QUESTION 5

A client wants to integrate a source control system to manage and maintain the cloud templates for their new installation of vRealize Automation.

Which solution should be included as part of the vRealize Automation logical design?

- A. Git
- B. Subversion
- C. vRealize SaltStack Config
- D. Gerrit

Correct Answer: A
