QUESTION 1

A customer has a requirement that an external auditing system must be updated when specific Cloud Templates are released.

Which combination of event topic and subscription filter would meet the customer's requirement? (Choose two.)

- A. "Cloud template version configuration" event topic
- B. "Cloud template configuration" event topic
- C. No filter
- D. Filter on "blueprintId"
- E. Filter on "eventTopicId"

Correct Answer: BD

QUESTION 2

An architect is completing the physical design for a vRealize Operation (vROps) solution for a customer. The customer has only provided the following information for their existing environment:

500 Virtual Machines
2 VMware vCenter Servers
10 VMware vSphere Hosts
20 Datastores
Live data should be stored within the vROps solution for 6 months
The RTO for all existing management components is 4 hours
The RPO for all existing management components is 1 hour

Which two assumptions could the architect make when sizing the vROps cluster? (Choose two.)

- A. The vROps cluster will be configured as High Availability.
- B. The RTO of the vROps solution will be 4 hours.
- C. The resource profile of a virtual machine will be, on average, 1 vCPU and 2 GB RAM.
- D. The minimum data retention within vRealize Operations Cluster will be 12 months.
- E. The RPO of the vROps solution will be 1 hour.

Correct Answer: AB

QUESTION 3

A customer wants to design and deploy Workspace ONE Access to provide multi-tenancy for vRA 8.x deployment.

Which two design decisions would achieve the customer's requirement? (Choose two.)

Note: SAN stands for Subject Alternative Name.

- A. Configure a certificate with multiple SAN entries for Workspace ONE Access.
- B. Configure SSL termination on the load balancer for Workspace ONE Access.
- C. Configure SSL bridging on the load balancer for Workspace ONE Access.
- D. Configure SSL passthrough on the load balancer for Workspace ONE Access.
- E. Configure a certificate with a single SAN entry for Workspace ONE Access.

Correct Answer: BE

QUESTION 4

An architect is designing a vRealize Log Insight cluster for an organization with the following requirements:

The organization has an external load balancer available to provide load balancing for various requirements.

Due to budget constraints the organization need to reuse existing environment as much as possible.

What should the architect choose as the load balancing solution for the vRealize Log Insight cluster?

- A. Use the integrated load balancer
- B. Deploy a new external load balancer
- C. Use the existing external load balancer
- D. Use both integrated and external load balancers

Correct Answer: A

QUESTION 5

A customer wants to collect data from 120,000 objects and given the vRealize Operations sizing guide: (See exhibit.)

	vRealize Operations Node				
	Extra Small	Small	Medium	Large	Extra Large
Configuration					
vCPU	2	4	8	16	24
Default Memory (GB)	8	16	32	48	128
Maximum Memory Configuration (GB)	N/A	32	64	96	N/A
Objects and Metrics					
Single-Node Maximum Objects	350	5,000	15,000	20,000	45,000
Single-Node Maximum Collected Metrics	70,000	800,000	2,500,000	4,000,000	10,000,000
Maximum number of nodes in a cluster	1	2	8	16	8

Assuming the customer has no requirements for continuous availability or high availability, what recommendation for the quantity and type of nodes should the architect provide?

- A. 3 Extra Large Nodes
- B. 6 Large Nodes
- C. 12 Large Nodes
- D. 8 Medium Nodes

Correct Answer: D
