QUESTION 1

An architect is tasked with designing a backup strategy for vRealize Orchestrator as part of an upcoming production rollout of a Cloud Management Platform. Which are two valid backup design recommendations? (Choose two.)

A. If vRealize Orchestration is embedded within the vRealize Automation appliance, perform its backup along with Manager Services for vRealize Automation.

B. Perform backup of vRealize Orchestrator virtual machines in the order of the startup priority.

C. If vRealize Orchestrator is a standalone component, perform its backup before backing up vRealize Automation components in no particular order.

D. Perform file-level backup of the Orchestrator database only after a successful full virtual machine backup.

Correct Answer: CD

QUESTION 2

A company is having a hard time with its competition given that its time to market for new services is lengthy. It wants to speed things up with an automated provisioning solution. Which three pieces of information would help the architect provide the right solution? (Choose three.)

A. What is the approval process?

B. How is a service requested by a business user?

C. How many requests do they receive in a given period of time?

D. How many people can ask for services inside the company?

E. Who can approve the service requests?

Correct Answer: ABC

QUESTION 3

An architect is expecting to run 25 to 30 concurrent workflows for provisioning in a vRealize Automation environment. Which is the minimum number of DEM workers needed to meet these requirements?

A. 3

B. 4

C. 2

D. 1

Correct Answer: C

QUESTION 4

An "automated 3 0 day power off and archive" technical requirement would map to which two infrastructure qualities? (Choose two.)

A. Availability

B. Security

C. Recoverability

D. Manageability

Correct Answer: AD

QUESTION 5

A new vSphere cluster has been added to a production environment. The architect has been tasked with managing this cluster from vRealize Automation . Which two methods could be used to begin consuming this new cluster for all future deployments? (Choose two.)

A. Create a new reservation using the new compute resource and set the priority to a lower number than the existing production reservation.

B. Create a new reservation using an existing compute resource and set the priority to a higher number than the existing product ion reservation.

C. Modify the existing production reservation by changing the compute resource used to the new vSphere cluster.

D. Create a new reservation using the new compute resource and disable the existing production reservation.

Correct Answer: BC
