-  **800,000+** Satisfied Customers

**QUESTION 1**

An enterprise class software company merged with an enterprise class storage provider. Both had operational vRealize Automation environments prior to the merger. The architect has recommended a combined private cloud (vRealize Automation) environment.

The following requirements have been set:

?There should be separate email servers for notification. ?Blueprints should NOT be visible across organizations. ?Property group(s) should be unique to each organization. ?Machine prefixes should be unique to each organization with duplicate machine names. What should the architect recommend to meet these requirements?

- A. Separate tenant for each organization.
- B. Separate business group for each organization.
- C. Custom group for each organization as tenant administrator within the default tenant.
- D. Separate fabric group for each organization.

Correct Answer: A

QUESTION 2

Development team members would like to build new virtual machines using vRealize Orchestrator workflow.

They would also like them to be added automatically to DNS prior to initial start. The domain administration team is responsible for DNS and requires review of any DNS entry requests prior the creation of new machines.

Which design will satisfy these requirements?

- A.
 - Design an Event Broker subscription for the machine using the CloneWorkflow.BuildComplete Provisioning State name.
 - Design a post-approval for the XaaS component that is assigned to the development team requiring authorization to process the XaaS workflow.
- B.
 - Design an Event Broker subscription for the machine using the CloneWorkflow.InitialPowerOn Provisioning State name.
 - Design a pre-approval for the Event Broker subscription that is assigned to the development team requiring authorization to process the XaaS workflow.
- C.
 - Design an XaaS workflow for adding the machines to DNS and add it to the development catalog.
 - Design a post-approval for the machine that is assigned to the domain administration team requiring authorization to build the machine.
- D.
 - Design an XaaS workflow for adding the machines to DNS and add it to the blueprint.
 - Design an pre-approval for the machine that is assigned to the domain administration team requiring authorization to build the machine.

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: A

QUESTION 3

A cloud architect has developed the following diagram showing the relationship between different parts of a vRealize Suite deployment, including vRealize Operations components. View the exhibit.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. This diagram depicts the physical design of the solution.
- B. The Analytics Cluster has an incoming dependency on the Remote Collector Cluster.
- C. The Remote Collector Cluster has an incoming dependency on the Analytics Cluster.
- D. This diagram depicts the logical design of the solution.

Correct Answer: BC

QUESTION 4

A company has deployed vRealize Automation into its production environment and now wants to integrate it with different components of its infrastructure through the REST API. What are three services provided by the REST API? (Choose three.)

- A. Blueprint Service
- B. Forms Service
- C. Monitoring Service
- D. Portal Service
- E. Approval Service

Correct Answer: CDE

QUESTION 5

The lead architect for a teaching hospital in Seattle is planning the deployment of a highly-distributed Cloud Management Platform based on VMware vRealize Automation. The design must include log aggregation and analytics for in-depth

troubleshooting and analysis when issues arise and ensure a seamless experience for the operations teams.

The organization must use vRealize Log Insight for log aggregation and analysis.

The organization currently uses vRealize Operations for monitoring, alerting and capacity management.

The design will use external vRealize Orchestrator Appliances.

Match the actions to the components. Some of the components may be associated with more than one action.

Select and Place:

Configure vRealize Log Insight Linux Agent	<p>Answer Area</p> <p>vRealize Automation IaaS Servers</p> <input type="text"/> <input type="text"/> <p>vRealize Automation Appliances</p> <input type="text"/>	vRealize Log Insight
Install vRealize Automation Content Pack		<input type="text"/>
Install vRealize Automation Management Pack		<input type="text"/>
Configure vRealize Automation Management Pack		vRealize Operations Manager
Install vRealize Log Insight Windows Agent		<input type="text"/>
Configure vRealize Log Insight Windows Agent		<input type="text"/>
Enable Launch-in-Context		<input type="text"/>

Correct Answer:

Configure vRealize Log Insight Linux Agent

Install vRealize Automation Content Pack

Install vRealize Automation Management Pack

Configure vRealize Automation Management Pack

Install vRealize Log Insight Windows Agent

Configure vRealize Log Insight Windows Agent

Enable Launch-in-Context

Answer Area

vRealize Automation IaaS Servers

Install vRealize Log Insight Windows Agent

Install vRealize Automation Content Pack

vRealize Automation Appliances

Install vRealize Automation Content Pack

vRealize Log Insight

Configure vRealize Log Insight Linux Agent

Configure vRealize Log Insight Windows Agent

vRealize Operatons Manager

Install vRealize Automation Management Pack

Configure vRealize Automation Management Pack
