QUESTION 1

A company has decided to implement Workspace One on premise.

1.

 Workspace One portal will be used by end users to simplify access to web, mobile and Windows based applications.

2.

 As part of the solution, the company is planning on using Horizon 7 Application Publishing.

3.

 Published Applications will be used for applications frequently used by mobile users.

During a proof of concept (POC), users noted that it was too cumbersome to enter Active Directory username and password and RSA SecureID using mobile devices.

The Chief Security Officer (CSO) stated:

1.

 Multi-factor is a requirement for a subset of the applications.

2.

 End-users must have as seamless as possible authentication using mobile devices.

Which solution can satisfy the CSO\\\'s requirements?

A. Implement VMware Identity Manager with Mobile SSO. Configure Access Policies to require RSA SecureID authentication for the subset of applications and implement TrueSSO in Horizon.

B. Implement VMware Identity Manager with VMware Verify for easy authentication. Since VMware Verify offers two factors no extra access policies is needed.

C. Implement VMware Identity Manager with Mobile SSO. Configure Access Policies to require VMware Verify authentication for the subset of applications and implement TrueSSO in Horizon.

D. Implement VMware Identity Manager with SSO. Configure Access Policies to require VMware Verify authentication for the subset of applications.

Correct Answer: C

QUESTION 2

The finance group in a company has asked for a new application to be made available to all of the members of the finance department. The application is currently installed on all the finance desktops, but will be moving to a cloud-hosted model.

What solution should the IT administrator use to manage access to the new application?

A. Package the application using ThinApp and deploy to the finance department.

B. Manage the application with VMware Identity Manager.

C. Assign the new application to the finance department using App Volumes.

D. Deploy each user a new cloud based virtual desktop.

Correct Answer: B

QUESTION 3

Which protocol set is used to access physical workstations with high-end 3D graphics cards?

A. Blast Extreme, PCoIP, RDP, RGS

B. Blast Extreme, PCoIP, RDP

C. Blast Extreme, PCoIP

D. Blast Extreme, PCoIP, RGS

Correct Answer: C

QUESTION 4

An architect has been asked to evaluate the existing Active Directory infrastructure to implement a Horizon 7-based virtual Desktop infrastructure. The Active Directory Admin helped the architect create the attached exhibit related to the current Active Directory.
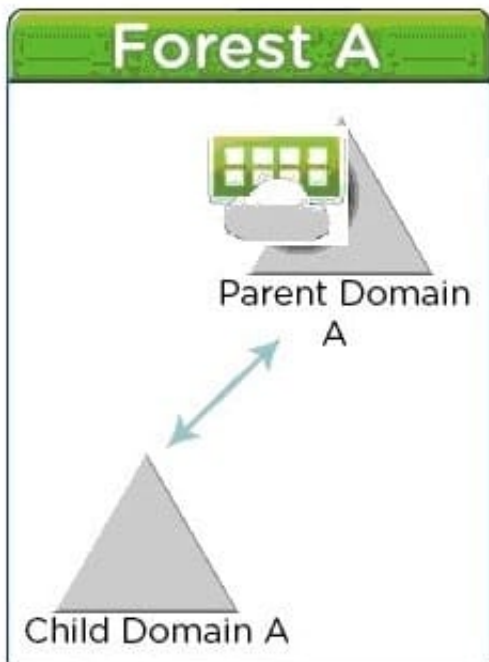

The customer specified these requirements:

1.

 Extend the same Horizon 7 infrastructure to a 20 User Organization from Stand-Alone Domain.

2.

 Two users from the Stand-Alone Domain must have Administration access to Horizon View Infrastructure.

The architect has been asked to recommend Active Directory changes with a constraint of least possible trust relationship and credential duplication to meet the additional requirement.

Referring to the exhibit, which two recommendations would enable Active Directory infrastructure to meet requirements?

A. Configure Secondary credential for View administration users only.

B. Establish two-way trust relationship between Parent Domain A and Stand-Alone Domain.

C. Establish one-way trust relationship between Parent Domain A and Stand-Alone Domain.

D. Configure Secondary credential for View Desktop users only.

E. Configure Secondary credential for View Desktop users and View Administration Domain.

Correct Answer: AE

QUESTION 5

A government organization wants to deploy a brand new Horizon system using RDSH desktop automated farms while installing the fewest instances of Windows servers. They also want to preserve user profiles, personalization and

application customization.

Which option meets the requirements?

A. Use RDSH instant clone farms and App Volumes including Writable Volumes.

B. Use RDSH linked clone farms and App Volumes including Writable Volumes.

C. Use RDSH instant clone farms and User Environment Manager

D. Use RDSH linked clone farms and User Environment Manager

Correct Answer: C
