**QUESTION 1**

The CIO of a company has asked that a review of all user's applications be undertaken to improve storage usage. After the review, it was found that a number of applications are used by several different organizations within the company. These applications are currently all installed in all of the different master images, making each of the master images very large.

What VMware technology would improve storage usage?

- A. VMware FLEX
- B. VMware Mirage
- C. Horizon Published Applications
- D. VMware Identity Manager

Correct Answer: C

QUESTION 2

The IT Team at a small company wants to use Horizon Apps to deploy a specialized 3D modeling application with image scanners using minimum storage space. It has installed RDS and the 3D application on a Master RDS VM.

What steps remains in the deployment?

- A. Install Horizon Agent on the Master RDS VM including the 3D RDSH and Scanner Redirection options Clone the Master RDS VM Create a manual RDS Farm using the clones Create a desktop pool Entitle the desktop pool
- B. Install Horizon Agent on the Master RDS VM including the 3D RDSH and View Composer options Create an automated RDS Farm using the Master RDS VM Create a desktop pool Entitle the desktop pool
- C. Install Horizon Agent on the Master RDS VM including the 3D RDSH and Instant Clone options Create an automated RDS Farm using the Master RDS VM Create a desktop pool Entitle the desktop pool
- D. Install Horizon Agent on the Master RDS VM including the 3D RDSH and Serial Port Redirection options Clone the Master RDS VM Create a manual RDS Farm using the clones Create a desktop pool Entitle the desktop pool

Correct Answer: A

QUESTION 3

A company has decided to implement RDS Application Pools. Its current server standard is Windows Server 2008 R2. The application requires access to a client USB device.

What must be done to allow USB redirection for this setup?

- A. Install new RDS servers using Windows Server 2012 R2.
- B. Install View Client on user device with USB redirection feature enabled.

C. Install VMware User Environment Manager.

D. Install View Agent on existing RDS Servers and select USB redirection to be included.

Correct Answer: D

QUESTION 4

A company has decided to implement Workspace One on premise.

1.

Workspace One portal will be used by end users to simplify access to web, mobile and Windows based applications.

2.

As part of the solution, the company is planning on using Horizon 7 Application Publishing.

3.

Published Applications will be used for applications frequently used by mobile users.

During a proof of concept (POC), users noted that it was too cumbersome to enter Active Directory username and password and RSA SecureID using mobile devices.

The Chief Security Officer (CSO) stated:

1.

Multi-factor is a requirement for a subset of the applications.

2.

End-users must have as seamless as possible authentication using mobile devices.

Which solution can satisfy the CSO's requirements?

A. Implement VMware Identity Manager with Mobile SSO. Configure Access Policies to require RSA SecureID authentication for the subset of applications and implement TrueSSO in Horizon.

B. Implement VMware Identity Manager with VMware Verify for easy authentication. Since VMware Verify offers two factors no extra access policies is needed.

C. Implement VMware Identity Manager with Mobile SSO. Configure Access Policies to require VMware Verify authentication for the subset of applications and implement TrueSSO in Horizon.

D. Implement VMware Identity Manager with SSO. Configure Access Policies to require VMware Verify authentication for the subset of applications.

Correct Answer: C

QUESTION 5

A company asked an architect to design a VMware Horizon View 7.1 solution utilizing security servers to support 7500 local network users and 3500 remote sales personnel. These requirements were requested:

1.

Design must provide high availability

2.

Design must use VMware's supported minimum number of connection servers

3.

All users will connect with BLAST or PCoIP

Which two minimums can the architect recommend to meet requirements? (Choose two.)

A. 2 Connection Server for local users

B. 2 Connection Servers for remote users

C. 3 Connection Servers for remote users

D. 3 Connection Servers for local users

Correct Answer: AB
