**QUESTION 1**

What are two examples of business goals to be considered when a network design is built? (Choose two.)

- A. standardize resiliency
- B. minimize operational costs
- C. integrate endpoint posture
- D. ensure faster obsolescence
- E. reduce complexity

Correct Answer: BE

QUESTION 2

Your network operations team is deploying Access Control Lists (ACLs) across your Internet gateways. They wish to place an ACL inbound on the Internet gateway interface facing the core network (the "trusted" interface). Which IP address would the ACL need for traffic sourced from the inside interface, to match the source address of the traffic?

- A. inside global
- B. outside global
- C. inside local
- D. outside local

Correct Answer: C

QUESTION 3

The major business applications of an enterprise are largely monolithic and hard-coded. As part of a major modernization and overhaul of the applications, the goal is to move to a modular and containerized application architecture. At the same time, decoupling from the hardware is desired to move to an on-demand provisioning. However, the CyberOps team mandated that the final architecture must provide the same security levels as an air-gapped data center. Which cloud architecture meets these requirements?

- A. IaaS
- B. private cloud
- C. PaaS
- D. hybrid cloud
- E. public cloud

Correct Answer: B

QUESTION 4

Identity and access management between multiple users and multiple applications has become a mandatory requirement for Company XYZ to fight against ever increasing cybersecurity threats. To achieve this, federated identity services have been deployed in the Company XYZ network to provide single sign-on and Multi-Factor Authentication for the applications and services. Which protocol can be used by Company XYZ to provide authentication and authorization services?

- A. OAuth2
- B. OpenID Connect
- C. OpenID
- D. SAML2.0

Correct Answer: D

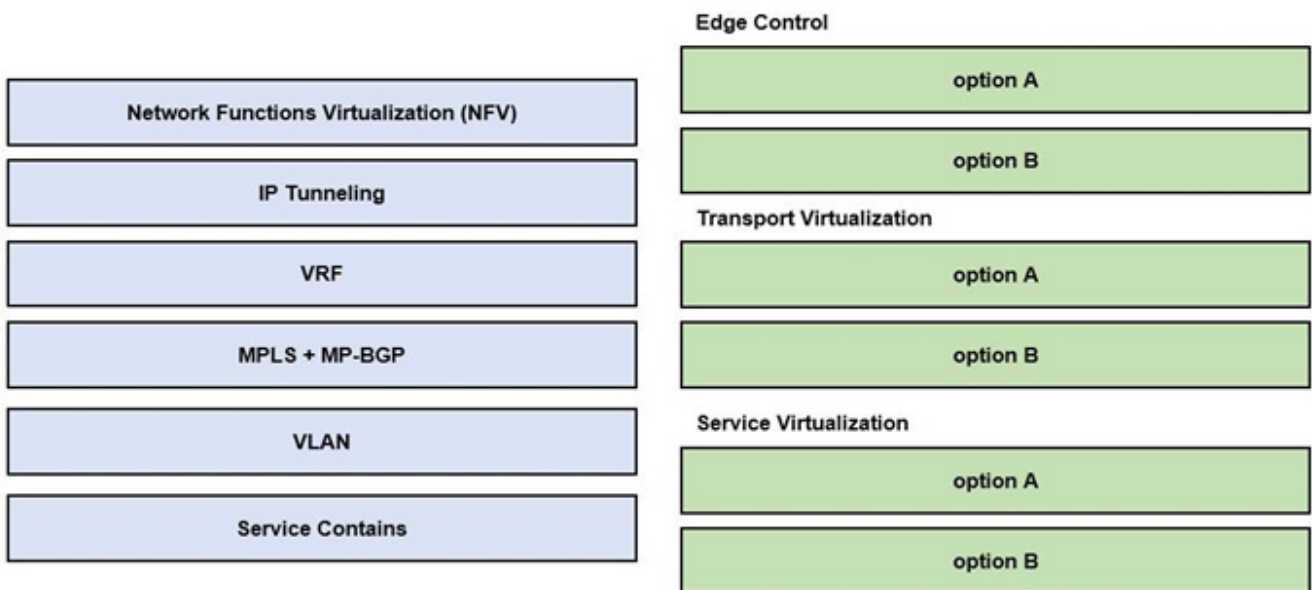

OpenID lacks user authorization data (such as permissions) and focuses primarily on identity assertion.

QUESTION 5

DRAG DROP

Drag and drop the end-to-end network virtualization elements from the left onto the correct network areas on the right.

Select and Place:

Correct Answer:

Edge Control

VLAN

VRF

Transport Virtualization

IP Tunneling

MPLS + MP-BGP

Service Virtualization

Service Contains

Network Functions Virtualization (NFV)
