QUESTION 1

A wireless engineer must configure bandwidth-based admission control on the company WLC for video applications. After applying the necessary configuration changes to the corporate WLAN, the engineer notices that the bandwidth is not

being allocated correctly.

Which problem is true?

A. Admission control cannot work with 802.1X security.

B. The WLAN must have gold QoS configured.

C. Only CCX v2 clients were connected to the WLAN at the time of the testing.

D. An AVC profile must be assigned to the WLAN for the admission control to work properly.

Correct Answer: B

QUESTION 2

You have been hired to install new Cisco switches at ACME Corporation. The company has an existing Cisco network comprised of access layer switches that use multiple VLANs and VLAN trunking protocol to distribute the VLANs to the switches throughout the network. Which two methods are best to accomplish your task? (Choose two.)

A. Configure the VLAN Trunking Protocol pruning on the new switches because they may not need all of the VLANs.

B. Prior to installation, ensure that all switches are running the same Cisco IOS software version as the VTP server.

C. Ensure that all the new Cisco switches have their VTP domain name set to the default value of null

D. Configure one of the new switches as a VTP server to distribute the VLANs appropriately.

E. Ensure that all switches have the same VLAN Trunking Protocol password and encryption level.

F. Configure all new switches as VTP clients and relocated switches as VTP server because the already have all the VLANs in their database.

G. Ensure that all switches are running the same VTP version.

Correct Answer: EG

From:

VTP Configuration Guidelines and Restrictions

Follow these guidelines and restrictions when implementing VTP in your network:

- All network devices in a VTP domain must run the same VTP version.

- You must configure a password on each network device in the management domain when VTP is in secure mode.

⚠️ **Caution**   If you configure VTP in secure mode, the management domain will not function properly if you do not assign a management domain password to each network device in the domain.

QUESTION 3

When configuring Application Visibility and Control on the wireless controller, which two restrictions must be considered prior to AVC configuration and implementation? (Choose two.)

A. IPv6 packet classification is not supported.

B. The number of applications that you can apply rate limit is 9.

C. Controller CLI support is not present for the AVC Protocol Pack feature.

D. AVC rate limiting is not supported on the Cisco 5520 WLCs.

E. Multicast traffic is not supported.

Correct Answer: AC

QUESTION 4

Which three statements about the high availability configuration on the Cisco 5760 WLCs are true? (Choose three.)

A. Cisco WLC with more reboots is elected as active when the default stack priority is in use.

B. EtherChannel bundles all ports on both active and standby Cisco WLC on a logical port.

C. Cisco 5760 WLC uses a dedicated high availability port for high availability and configuration synchronization.

D. High availability switchover is triggered when one of the ports on the active Cisco WLC EtherChannel bundle fails.

E. Active Cisco WLCs in a pair can be identified using LED state without issuing any command on the Cisco WLC console.

F. Cisco WLC with the highest priority in a stack are elected as the active Cisco WLC during the election process.

G. All configuration including certificates are automatically synced between active and standby Cisco WLC.

Correct Answer: BEF

QUESTION 5

Which two characteristics of an IoT network are true? (Choose two.)

A. The transmission rate in an IoT network is consistent.

B. IoT networks must be designed for low-powered devices.

C. IoT networks use IS-IS for routing.

D. IoT networks are 100% reliable

E. IoT networks are bandwidth constrained

Correct Answer: BE
