**QUESTION 1**

Which of the following statements regarding the default scheduler in the Nokia 7750 SR are TRUE? (Choose two)

- A. There are a maximum of 8 levels of priority serviced using a round-robin algorithm.
- B. The default scheduler will spend an equal amount of time in each queue, as long as there is traffic present
- C. The H1 internal forwarding class will receive its CIR before AF traffic.
- D. Orphaned queues will be scheduled out of the BE queue.
- E. A queue servicing EF and AF traffic will require explicit configuration to set the queue to expedited.

Correct Answer: CE

QUESTION 2

Which of the following is NOT an advantage of deploying queue-groups on a network port?

- A. It enables fine-tuned SLA control that is not possible when using a common set of queues for all L2/L3 services.
- B. It enables CFHP and hierarchy scheduling (egress) for each network interface.
- C. It improves scalability by allowing the use of queues instead of the default set of policers used on network egress.
- D. It allows for enforcing bandwidth reservations of the LSPs that are used by the SDPs configured on the network interfaces.

Correct Answer: B

QUESTION 3

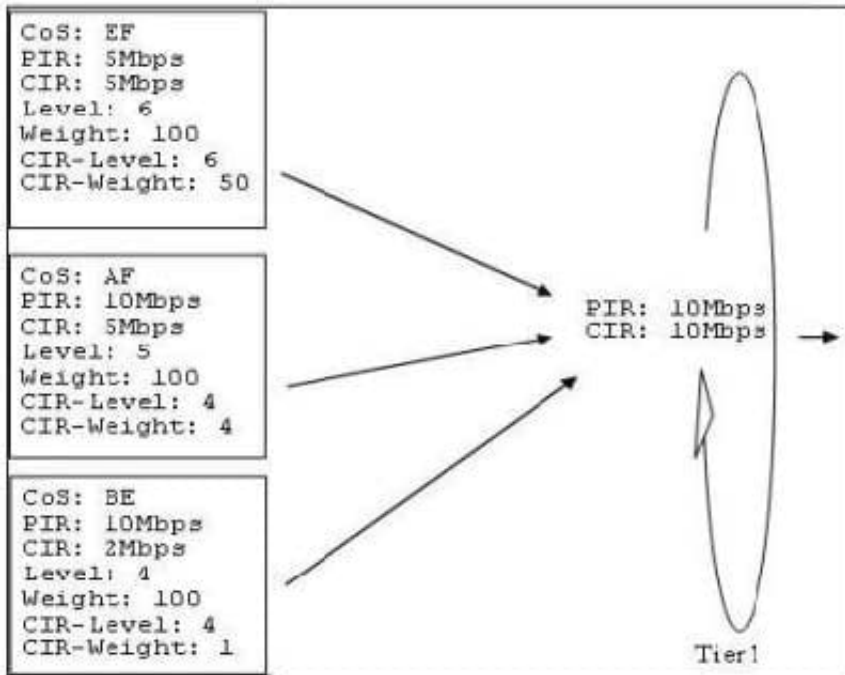

Where is a QoS network queue policy applied?

- A. Ingress SAP or egress SAP
- B. Egress port or ingress MDA
- C. Egress MDA or ingress network interface
- D. Egress network interface or ingress MDA

Correct Answer: B

QUESTION 4

Click the exhibit button below. Given the scheduler-policy (below), which of the following can be done to guarantee that the best-effort traffic receives its configured CIR value?

- A. Change the CIR-level value for the best-effort queue to 8.
- B. Do not change anything; it is already guaranteed to receive its CIR
- C. Change the CIR-level value for the best-effort queue to 1.
- D. Change the CIR-weight value of the AF queue to 0.

Correct Answer: AD

QUESTION 5

With hierarchical scheduling, up to _____ tiers are supported on the Nokia 7750 SR.

- A. 8
- B. 3
- C. 4
- D. 5
- E. 6

Correct Answer: B
