-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Individual application streams are considered microflows, whereas _____ are considered macroflows.

- A. SAPs
- B. SDPs
- C. Services
- D. Queues
- E. Schedulers
- F. Forwarding classes

Correct Answer: F

QUESTION 2

Which of the following statements describes an advantage of the DiffServ QoS model over the IntServ QoS model?

- A. DiffServ reserves resources dynamically using the RSVP protocol.
- B. DiffServ only requires packets to be classified into forwarding classes at the first network hop.
- C. DiffServ provides granular differentiation and superior fairness because it processes traffic streams individually.
- D. DiffServ is more scalable it treats traffic streams as aggregates.

Correct Answer: D

QUESTION 3

A queue is configured with the following attributes:

MBS = 10KB CBS = 5KB High-Priority-Only = 20%

Assume that there is no CBS overbooking and that the slope-policy is disabled. If the current queue depth is 3KB, what will happen to an out-of-profile packet arriving at an egress queue?

- A. It will be queued in the reserved portion of the buffer pool and remain out-of-profile.
- B. It will be queued in the reserved portion of the buffer pool if there are no in-profile packets already in the queue.
- C. It will be queued in the reserved portion of the buffer pool and be in-profile.
- D. It will be queued in the shared portion of the buffer pool but contend for shared buffer space with packets from other queues.
- E. It will be queued in the shared portion of the buffer pool but may be dropped if the buffer utilization exceeds the start-

average value of the low slope.

Correct Answer: A

QUESTION 4

Which of the following are NOT ingress matching criteria for a network policy? (Choose two)

- A. TCP port numbers
- B. LSP EXP
- C. DSCP
- D. Source and destination IP addresses
- E. Dot1p priority

Correct Answer: AD

QUESTION 5

Which of the following statements BEST defines policing?

- A. The process of delaying packets within a traffic stream to have them conform to a defined traffic profile.
- B. The overall treatment of a defined subset of a customer's traffic within a DiffServ domain.
- C. The process of discarding packets within a traffic stream in accordance with the state of a meter to enforce a defined traffic profile.
- D. The action of setting the DiffServ codepoint of a packet prior to its entry into a downstream DiffServ domain.
- E. A specified algorithm or operation that is implemented in a node in order to realize one or more per-hop behaviors.

Correct Answer: C
