**QUESTION 1**

Where can the SAML Certificate Expiry details be checked in PCCE Web Administration Manager (S.RO.G)?

- A. Features -> Context Service
- B. Infrastructure Settings -> License Management
- C. Features -> Single Sign-On
- D. Infrastructure Settings -> Device Configurations -> Identity Services

Correct Answer: C

The SAML Certificate Expiry details can be checked in the PCCE Web Administration Manager (S.RO.G) under the Features -> Single Sign-On menu. This menu can be used to view the certificate details, such as the issuer, validity period,

and expiry date. This can be useful for ensuring that the certificate does not expire before its intended use.

QUESTION 2

What are two functions of a SIP Proxy Server? (Choose two.)

- A. centralizes dial plans
- B. connects to Call Router
- C. handles box-to-box redundancy
- D. helps to centralize the administration and call control
- E. load balancer for HTTP and SIP

Correct Answer: AD

A SIP Proxy Server is a network element that helps to centralize the administration and call control, as well as the management of SIP sessions. It can also be used to centralize dial plans, which are the instructions that are used to route calls.

Additionally, a SIP Proxy Server can be used to provide load balancing, which helps to ensure that calls are routed to the most appropriate server.

QUESTION 3

Which two validations will be completed for the PCCE production deployment model on an ESXi server? (Choose two.)

- A. Linux verification for containers.
- B. The hypervisor provides enough power.
- C. The lab is deployed properly.
- D. Ensure that the correct servers are on the correct sides.
- E. Correct RAM and CPU are being deployed.

Correct Answer: DE

Ensure that the correct servers are on the correct sides ensures that the ESXi server hosting the PCCE production environment is configured according to the documentation and that the correct servers are on the correct sides. Ensure that

the correct RAM and CPU are being deployed ensures that the ESXi server is configured to have the correct amount of RAM and CPU cores for the PCCE production environment.

QUESTION 4

Which mode can be used to display data flow in the Script?

- A. Edit Mode
- B. Monitor Mode
- C. Quick Edit Mode
- D. Browse Mode

Correct Answer: B

Monitor Mode is a feature of the Packaged CCE Script Editor that allows you to view the flow of data through the script. This can be used to troubleshoot any issues with the script and ensure that it is functioning properly. Edit Mode is used to edit the Script, Quick Edit Mode is used to quickly edit basic script elements, and Browse Mode is used to view the data elements available in the Script.

QUESTION 5

Which keytool command lists certificates in the cacerts file?

- A. `keytool -list -showinfo`
- B. `keytool -list -keystore cacerts`

C. keytool -list cacerts

D. keytool -list -alias

Correct Answer: B

The command `keytool -list -keystore cacerts` can be used to list certificates in the `cacerts` file. This command will display information about the certificates in the `cacerts` file, including the certificate's alias, owner, issuer, and validity period.

This command can be used to verify the certificates that are used for authentication and secure communication.
