QUESTION 1

Which three options does Cisco provides customers in terms of "Visibility and Control" against today\\'s threats? (Choose three)

A. Granular device visibility and management

B. Unparalleled network and endpoint visibility

C. 18-month device release cycle

D. Bandwith Utilization Monitoring

E. Comprehensive policy enforcement

F. Fast device policy updates

Correct Answer: ABF

QUESTION 2

Which of AMP\\'s File capabilities deals with the problem of files passing through perimeter defenses that are later discovered to be a threat?

A. Dynamic Analytics

B. Trajectory

C. Malware Security

D. File Retrospection

Correct Answer: D

Tracks the spread of any file within your network and continuously monitors file reputation over time. If a file reputation changes to malicious or is found by file sandboxing to be malicious, AMP provides retrospective alerting in the after phase. AMP identifies every instance of the file within your network to address the problem of malicious files passing through perimeter defenses that are later deemed a threat.
