QUESTION 1

Which are two benefits of integrating Cisco UCS C-series servers with Cisco UCS Manager? (Choose two)

- A. Cisco UCS Manager provides the ability to automatically update C-series firmware and device drivers from a single global interface.
- B. Cisco UCS Manager provides the ability to manage C-series in multiple physical domains from a single global interface
- C. Cisco UCS Manager uses service profiles and resource pools to allow the deployment of multiple servers with a single common template
- D. Cisco UCS Manager is able to act as a common centralized management platform for both blade and rack servers in a single domain.
- E. Cisco UCS Manager can automatically power on and off servers to scale elastically according to application performance demands

Correct Answer: CE

QUESTION 2

Which two statements describes connecting the IO Modules in the UCS chassis to the Fabric interconnects? (Choose two)

- A. Connect FI-A to the IOM B of each chassis
- B. Connect FI-B to IOM A and IOM B in each chassis
- C. Connect FI-A to the IOM A of each chassis
- D. Connect FI-A to IOM A and IOM B in each chassis
- E. Connect FI-B to the IOM A of each chassis
- F. Connect FI-B to the IOM B of each chassis

Correct Answer: ACF

QUESTION 3

Which are two Application Gateways primary roles? (Choose two) A. Manage configuration changes during FSM transitions

- B. Communicate with virtual machines and report health and state
- C. Automate updates to the XML Database

- D. Communicate with end points and report their health and state
- E. Manage configuration changes made with UCS Manager

Correct Answer: AC

QUESTION 4

When it comes to pinning vNIC traffic from a UCS Server to the Fabric Interconnect uplink what configuration can you perform?

- A. You can configure Automatic Uplink Pinning. If an uplink interface fails on one Fabric Interconnect, the server will fail to the first available uplink on the other Fabric Interconnect
- B. You can configure Static Uplink Pinning. If an uplink interface fails on one Fabric Interconnect, the server will fail to the first available uplink on the other Fabric Interconnect
- C. You can configure Automatic Uplink Pinning. If an uplink interface fails on one Fabric Interconnect the server will fail to the matching uplink on the other Fabric Interconnect
- D. You can configure Static Uplink Pinning. If an uplink interface fails on one Fabric Interconnect, the server will fail to the first available uplink on the same Fabric Interconnect
- E. You can configure Static Uplink Pinning. If an uplink interface fails on one Fabric Interconnect the server will fail to the matching uplink on the other Fabric Interconnect

Correct Answer: A

QUESTION 5

If a Cisco UCS B-Series server fails to initialize, which method of access is required to troubleshoot?

- A. Use direct console access to troubleshoot initialization
- B. Use Cisco UCS Manager GUI to troubleshoot initialization
- C. Use Cisco UCS Manager API to troubleshoot initialization
- D. Use KVM console to troubleshoot initialization

Correct Answer: D
