QUESTION 1

Refer to the exhibit.

An administrator builds a software-defined data center (SDDC) group to enable connectivity to native Amazon Virtual Private Clouds (VPCs). Which connectivity option is needed to enable connectivity across environments?

A. Tier-0 (T0) Router

B. Transit Gateway

C. Virtual Private Network

D. The Default Storage Scale-Out policy storage threshold is set 5% higher than the other Elastic DRS storage policies.

Correct Answer: A

QUESTION 2

Where would a VMware Cloud on AWS administrator generate an API token?

A. Organizational Settings

B. Identity and Access Management

C. Developer Center

D. My Account Section

Correct Answer: D

QUESTION 3

What is a supported approach when deploying multiple instances of VMware Site Recovery with VMware Cloud on AWS?

A. A single software-defined data center (SDDC) paired with up to 25 remote sites

B. A single software-defined data center (SDDC) connected to multiple on-premises sites and to other cloud SDDCs

C. VMware Site Recovery add-on deployed in the VMware vSphere Web Client

D. VMware Site Recovery with multiple protected sites and a shared recovery site

Correct Answer: B

QUESTION 4

A consultant is asked to help evaluate an environment for deployment into a new software-defined data center (SDDC) in VMware Cloud on AWS. The consultant is provided with a comma-separated value (CSV) file containing a list of workloads exported from VMware vCenter detailing only virtual machine configuration data, including vCPU, vRAM, and utilized storage. How should the consultant use the VMC on AWS Sizer?

A. Use the Advanced Sizer. Create workload profiles for the different workload types and set the values for configured resources manually.

B. Use the Advanced Sizer. Import the CSV file from VMware vCenter Server and let the VMware Cloud on AWS Sizer set the values for configured resources.

C. Use the Advanced Sizer. Import the CSV file from VMware vCenter Server and let the VMware Cloud on AWS Sizer set the values for configured resources.

D. Use the Quick Sizer. Manually enter the number of virtual machines and total resources for configured resources.

Correct Answer: D

QUESTION 5

An administrator is asked to create a new network segment in VMware Cloud on AWS. This network segment should be accessible from the on-premises data center. How would the administrator create this new network and what segment type should it be?

A. Connect to the on-premises VMware vCenter Server and create the network segment through the VMware vSphere user interface. Select the stretched network segment type.

B. Connect to the VMware Cloud console to create the network segment. Select the routed network segment type.

C. Connect to the VMware Cloud console to create the network segment. Select the extended network segment type.

D. Connect to the VMware Cloud on AWS vCenter Server and create the network segment through the VMware vSphere user interface. Select the routed network segment type.

Correct Answer: C
