**QUESTION 1**

A new security vulnerability has been identified in SSL. The VMware vCenter appliances in the company's latest VMware Cloud Foundation environment have been found to be impacted. VMware has released an updated ISO and upgrade bundle.

Which method should the administrator use to remediate this security vulnerability?

- A. Use NSX-T Distributed Firewall to block all incoming traffic until the patch is applied.
- B. Update VMware Cloud Foundation to a release containing the patch.
- C. Use VMware Update Manager to apply the update.
- D. Use VMware Lifecycle Manager to apply the update.

Correct Answer: C

QUESTION 2

An administrator did not deploy and configure Application Virtual Networks (AVN) during the initial VMware Cloud Foundation bring-up process. Which statement is correct?

- A. AVN disablement is not possible during the VMware Cloud Foundation bring up process.
- B. Cloud Foundation bring-up will fail since AVN is required to properly configure Management Domain.
- C. AVN deployment is disabled by default and must be enabled right after the VMware Cloud Foundation bring up process.
- D. vRealize Suite components must be deployed to VLAN-backed distributed port group.

Correct Answer: D

QUESTION 3

Which two integrations, in addition to computing resources, are provided in vSphere with Tanzu to deliver a native experience? (Choose two.)

- A. Advanced Monitoring with VMware Tools
- B. Networking via NSX Container Plugin
- C. IP Address Management via External Services
- D. Hypervisor Integration with KVM Hosts
- E. Cloud Native Storage via vSAN

Correct Answer: AC

QUESTION 4

Which two statements regarding MTU size should be considered prior to executing a deployment of VMware Cloud Foundation? (Choose two.)

- A. MTU of 1600 is a minimum for TFP VLANs
- B. MTU of 1500 is a minimum for TEP VLANs
- C. MTU of 9000 is a minimum for all non-management VLANs
- D. MTU of 9000 is recommended for all non-management VLANs
- E. MTU of 1500 is recommended for all non-management VLANs

Correct Answer: AE

QUESTION 5

For which VLAN must a DHCP server be configured prior to performing the VMware Cloud Foundation bring up process?

- A. NSX-T Edge Overlay
- B. Management
- C. NSX-T host Overlay
- D. NSX-T Host

Correct Answer: C
