### QUESTION 1

In what order must the step for protecting a workload for VMware on AWS DRaaS be completed?

- A. Add a virtual machine to a protection group, then replicate the virtual machine, then add the virtual machine to a recovery plan.
- B. Replicate a virtual machine, then add the virtual machine to a recovery plan, then add the virtual machine to a protection group.
- C. Replicate a virtual machine, then add the virtual machine to a protection group, then add the virtual machine to a recovery plan.
- D. Add a virtual machine to the recovery plan, then add the virtual machine to a protection group, then replicate the virtual machine.

Correct Answer: C

---

### QUESTION 2

For which configuration is the VMware Cloud on AWS DRaaS standard single-site topology deployment used?

- A. Multiple vCenter instances at multiple on-premises sites and single VMware Cloud on AWS SDDC.
- B. A single vCenter instance at one on-premises site and single VMware Cloud on AWS SDDC.
- C. Multiple vCenter instances at one on-premises site and single VMware Cloud on AWS SDDC.
- D. A single vCenter instance at multiple on-premises sites and single VMware Cloud on AWS SDDC.

Correct Answer: B

One vCenter instance on-premises and one vCenter instance in VMware Cloud on AWS.

#### QUESTION 4

What are the three primary objectives of a Hybrid Cloud Readiness Assessment? (Choose three.)

- A. Plan a datacenter migration.
- B. Determine the return on investment (ROI).
- C. Identify stakeholder needs.
- D. Identify on-boarding requirements for a hybrid environment on VMware Cloud on AWS.
- E. Establish billing accountability.
- F. Identify gaps in readiness for using a hybrid environment on VMware Cloud on AWS.

Correct Answer: BCF

---

#### QUESTION 5

A customer is looking for a reliable and cost-effective way to back up workload data running in VMware Cloud on AWS.

What is the most appropriate solution?

- A. Deploy a virtual machine AWS EC2 and mount AWS Elastic File Storage (EFS) to this virtual machine; configure this virtual machine as the backup target for image-based backups in VMware vSphere Data Protection.
- B. Deploy a virtual machine in VMware Cloud on AWS and mount AWS Elastic File Storage (EFS) to this virtual machine; configure this virtual machine as the backup target for image-based backups in VMware vSphere Data Protection.
- C. Create an S3 bucket in another availability zone and validate that the customers preferred backup solution is supported for VMware Cloud on AWS; otherwise guide the customer to choose another backup solution.
- D. Create an S3 bucket in the same availability zone and validate that the customers preferred backup solution is supported for VMware Cloud on AWS; otherwise guide the customer to choose another backup solution.

Correct Answer: B
