**QUESTION 1**

A company has applications deployed in separate networks/locations which are managed by different identities. The company needs a technology that can empower the admin to securely provide Single Sign-on (SSO) experience to end-users across the board among these applications.

Which technology should be recommended?

- A. Delegated Authentication
- B. Basic Authentication
- C. Legacy Authentication
- D. Claims-Based Authentication

Correct Answer: D

QUESTION 2

What is the primary purpose of VMware Workspace ONE Trust Network in VMware Workspace ONE Intelligence?

- A. Delivering VPN profiles to devices
- B. Assisting with integration of the Multi-Domain directory services across a trusted network
- C. Integrating threat data from security solutions, including endpoint detection and response (EDR) solutions
- D. Providing applications to end users

Correct Answer: C

QUESTION 3

A leadership team would like to enable VMware Workspace ONE Notifications with Hub Services so push notifications can occur to the end-user devices. Which types of notifications are sent?

- A. Immediate and Instructive
- B. Actionable and Informational
- C. Informational and Immediate
- D. Instructive and Actionable

Correct Answer: D

**QUESTION 4**

A VMware Workspace ONE environment has been setup with Roles Based Access Control (RBAC), and the directory-based administrators who managed in Workspace ONE UEM have limited permissions to access the console.

The administrator has enabled VMware Workspace ONE Intelligence in the environment and must now enable the correct configuration setting that will allow administrators to access VMware Workspace ONE Intelligence from VMware Workspace ONE UEM.

Which configuration setting must be enabled?

- A. Create a new admin role in the Intelligence Console, and then give the role Read and Edit permissions to Intelligence
- B. Create a new user role, and then give the role Read and Edit permissions to Intelligence in Categories > Monitor
- C. Create a new admin role, and then give the role Read and Edit permissions to Intelligence in Categories > Monitor
- D. Create a new user role in the Intelligence Console, and then give the role Read and Edit permissions to Intelligence

Correct Answer: C

QUESTION 5

Workspace ONE Access has been implemented in the environment, and User and Kerberos authentication services are now being configured. Which component is required to enable these services?

- A. Workspace ONE Content Gateway
- B. Workspace ONE Access Connector
- C. Workspace ONE UEM Cloud Connector
- D. Workspace ONE Unified Access Gateway

Correct Answer: D
