QUESTION 1

Management has directed that the SOC team be enabled to create global file bans via the App Control API.

How would this be configured in the App Control Console?

- A. Create a Role, map to corresponding SOC group, and add permission "Manage files" to Role.
- B. Add permission "Manage files" and create an API token for each SOC user.
- C. Create a Role, map to the corresponding SOC group, add permission "Manage files", and create API token for the Role.
- D. Create a Role, map it to the corresponding SOC group, add permission "Manage files" to Role, and create an API token for each user in group.

Correct Answer: C

QUESTION 2

An analyst is reviewing an alert in Enterprise EDR from a custom watchlist. The analyst disagrees with the alert severity rating.

How can the analyst change the alert severity value, if this is possible?

- A. The alert severity is assigned by the backend analytics.
- B. The alert severity is not configurable.
- C. Change the alert severity on the watchlist.
- D. Change the alert severity on the report.

Correct Answer: C

QUESTION 3

Refer to the exhibit:

Edit Group

General

Name *

Sensor Process Name

Server URL *

Site Assignment

Which statement is true in regards to communication between the sensor and server?

- A. The sensor must be able to resolve the name cb.yourcompany.com.
- B. The server must have an entry in the host file for cb.yourcompany.com.
- C. The communication is unencrypted.
- D. The sensor will communicate on a non-default port.

Correct Answer: C

QUESTION 4

A watchlist generates a false positive on the Triage Alerts page, so the watchlist must be updated. How should this task be accomplished?

- A. One can update watchlists directly on the Triage Alerts Page using the pencil icon.
- B. One can update watchlists from the Process Search Page.
- C. Open the process analysis page and select the Add Watchlist Exclusion option from the Actions menu.
- D. Open the Watchlist Page and click the pencil button associated with the watchlist.

Correct Answer: A

QUESTION 5

Given the following query:

```
SELECT * FROM users WHERE UID >= 500;
```

Which statement is correct?

- A. This query limits the number of columns to display in the results.
- B. This query filters results sent to the cloud.
- C. This query is missing a parameter for validity.
- D. This query returns all accounts found on systems.

Correct Answer: A
