**QUESTION 1**

Which statement about SDN southbound interfaces is true?

- A. They send the information for packet forwarding from the SDN controller to network devices.
- B. They send the information about packet forwarding statistics from network devices to the SDN controller.
- C. They send the information of network polices from applications to the SDN controller.
- D. They send the information of certificate authority from applications to the SDN controller.

Correct Answer: A

QUESTION 2

If the client has equipment from multiple vendors in their network, which statement about the technologies that can be used is true?

- A. Cisco onePK is a good candidate because it is vendor agnostic.
- B. Cisco onePK is vendor-specific and therefore cannot control all the equipment.
- C. OpenFlow is not a good candidate because it is vendor-specific.
- D. OpenFlow is not a good candidate because it is only for Layer 2 switches.

Correct Answer: B

QUESTION 3

You design the application to configure VXLANs on virtual switches that run on a supervisor like KVM.

Which two parameters should be set to each virtual switch by the application? (Choose two.)

- A. a VNI for each switch
- B. a VNI for each VTEP
- C. an IP multicast address for each VTEP
- D. an IP multicast address for each VNI
- E. the VXLAN master IP address for each VNI

Correct Answer: BD

**QUESTION 4**

A software developer has written an application that is experiencing high latency with user interaction in the web interface.

Which three dependencies should be analyzed? (Choose three.)

- A. Ensure the routing tables are up to date.
- B. Check for excessive CPU usage.
- C. Check network ACLs.
- D. Check database query results.
- E. Check DNS query results.

Correct Answer: BDE

QUESTION 5

Which three options are important concerns for security and auditing when architecting network applications? (Choose three.)

- A. Each application has a unique authentication.
- B. Passwords are not stored plain text in script files.
- C. Cisco onePK authentications occur over HTTPS.
- D. AAA Authorization limits application access to relevant CLI only.
- E. Change the Cisco onePK password from the default.

Correct Answer: ABD
