**QUESTION 1**

A technician is configuring a Link Aggregation connection from a stack of Ethernet Routing Switch (ERS) 5500 switches, to a core pair of ERS 8000 switches. Which statement about the correct uplink configuration is true?

- A. Distribute uplinks across different ERS 5500 switches in the stack.
- B. Disable autonegotiation and replace it with VLACP to identify single fiber fault failure.
- C. Use unique MLT IDs for each stack of edge ERS 5500 switches.
- D. Enable Spanning Tree Protocol for the MLT when using it with SMLT in the core of the network.

Correct Answer: B

QUESTION 2

On the VSP 9000 and ERS 8000, the Switch Fabric (SF) modules are installed to intelligently switch or route traffic coming into the chassis.

What determines the SF module function on the VSP 9000?

- A. campus size
- B. module type
- C. software version
- D. slot location

Correct Answer: D

QUESTION 3

After experiencing issues with XFPs, the show sys pluggable-optical-modules info CLI command is used to find the switch that does not recognize the XFPs.

What is another method that can be used to view the XFP compatibility?

- A. Check for port alarms.
- B. Show the DWDM-XFP {detail}.
- C. Ensure that the config sys is set for pluggable-optical-module info.
- D. Select Edit, Port, General, DDI/SFP from the Enterprise Device Manager.

Correct Answer: A

QUESTION 4

Which two management ports are available on the VSP 9000 CP module? (Choose two.)

- A. Serial interface
- B. USB (host) interface
- C. Ethernet interface
- D. Modem interface

Correct Answer: AC

QUESTION 5

EAPOL and 802.1X are examples of which kind of security within the ERS8000?

- A. Routing
- B. Data Path
- C. Control Path
- D. Management

Correct Answer: A
