**QUESTION 1**

Refer to the exhibit.

Which layer is the distribution layer?

- A. Layer A
- B. Layer B
- C. Layer C
- D. Layers A and B form a consolidated core and distribution layer

Correct Answer: B

QUESTION 2

What is the first step when creating a network security policy?

- A. define what should be protected
- B. investigate how likely an attack is to occur

- C. implement measures to protect assets
- D. hire a security firm to perform penetration tests

Correct Answer: A

QUESTION 3

Which three technologies are recommended to be used for WAN connectivity in today's Enterprise Edge designs? (Choose three.)

- A. DWDM
- B. Metro Ethernet
- C. Frame Relay
- D. MPLS VPN
- E. ISDN
- F. DSL
- G. Wireless

Correct Answer: ABD

There is some discussion about whether ISDN not DWDM should be the answer but it does say TODAY'S network

QUESTION 4

Characterizing an existing network requires gathering as much information about the network as possible. Which of these choices describes the preferred order for the information-gathering process?

- A. site and network audits, traffic analysis, existing documentation and organizational input
- B. existing documentation and organizational input, site and network audits, traffic analysis
- C. traffic analysis, existing documentation and organizational input, site and network audits
- D. site and network audits, existing documentation and organizational input, traffic analysis

Correct Answer: B

This section describes the steps necessary to characterize the existing network infrastructure and all sites. This process requires three steps:

Step 1. Gather existing documentation about the network, and query the organization to discover additional information. Organization input, a network audit, and traffic analysis provide the key information you need. (Note that existing documentation may be inaccurate.) Step 2. Perform a network audit that adds detail to the description of the network. If possible, use traffic-analysis information to augment organizational input when you are describing the applications and protocols used in the network. Step 3. Based on your network characterization, write a summary report that describes the health of the network. With this information, you can propose hardware and software upgrades to support the

network requirements and the organizational requirements.

QUESTION 5

Which three are security services offered through Cisco Router Security? (Choose three.)

- A. Trust and Identity
- B. Integrated Threat Control
- C. Unified Wireless Network Security Solution
- D. Secure Connectivity
- E. Voice-Messaging Security
- F. Endpoint Security
- G. Virtual Security Gateway

Correct Answer: ABD
