QUESTION 1

Time-of-day routing in Cisco Unified Communications Manager is configured in which of these ways?

- A. by specifying a time schedule on the phone device CSS
- B. by specifying a time period on the phone device CSS
- C. by specifying a time schedule on the partition that is being used for time-of-day routing
- D. by specifying a time period on the partition that is being used for time-of-day routing
- E. directly on the route pattern using an explicit timetable

Correct Answer: C

: Time-of-Day routing comprises individual time periods that the administrator defines and groups into time schedules. The administrator associates time schedules with a partition. In the Partition Configuration window, the administrator chooses either the time zone of the originating device or any specific time zone for a time schedule.

QUESTION 2

Which best describes the purpose of a Cisco Unity voice-mail profile?

- A. to determine whether to use the MWI on number and the MWI off number
- B. to determine the number that is dialed when users press the Message button
- C. to define voice-mail-related attributes
- D. to assign a partition to any email-related number

Correct Answer: C

QUESTION 3

Within MLA, what is the relationship between applications, privileges, and roles?

- A. Privileges and application resources are applied to roles.
- B. Users are assigned privileges, which are associated with groups, which, in turn, contain roles and applications.
- C. Application resources are assigned to roles, and privileges are assigned to applications.

D. Applications are associated with groups. Roles and privileges are assigned to applications.

Correct Answer: C

QUESTION 4

When a call is attempted during a particular time of day, what determines the partitions where calling devices search?

- A. time schedules
- B. calling periods
- C. dial schedules
- D. time periods

Correct Answer: A

QUESTION 5

Which of these two route patterns will be matched if 99118855 is dialed with en bloc dialing enabled?

9.911 Urgent Priority Enabled 9.[2-9]XXXXXX

- A. 9.911 will always be matched because it is tagged as Urgent Priority.
- B. 9.[2-9]XXXXXX will be matched first because en bloc dialing is being used. The Urgent Priority tag will be ignored in this case.
- C. There will be a tie between the two route patterns, and a random selection will be made.
- D. The 9.911 pattern will be dialed first and if the call is not successful, then the other potential match will be attempted.
- E. Cisco Unified Communications Manager will not be able to determine which pattern to match. For this reason, it will generate an annunciator message that the call cannot be completed as dialed.

Correct Answer: B
