QUESTION 4

Acme Company has two office buildings and has deployed Cisco Video Surveillance at this campus. A security guard who usually monitors surveillance video in Building A was asked to cover a colleague's shift in Building B. The operator successfully logs into Cisco SASD using his credentials and sees cameras in Building A, but is unable to view cameras in Building B.

What is causing this issue?

- A. The user belongs to the system-defined "operator" role, which does not have sufficient permissions to view cameras in Building B.
- B. The user logged into the media server A instead of media server B.
- C. The user does not have an account on media server B.
- D. The user does not belong to the user group for Building B.
- E. The user does not have a compatible version of Cisco SASD and should use Operations Manager instead.

Correct Answer: D

QUESTION 5

Refer to the exhibit.

An operator is trying to log into Cisco VSM, however the login screen does not allow a change to the username (field is greyed out).

What is causing this behavior?

- A. The operator is trying to log in on a workstation using an unsupported web browser, which allows only the local administrator to log in.
- B. The VSM system has just been rebooted and the user database has not been loaded yet. Refreshing the web page helps.
- C. The system is running low on resources and the access is temporarily limited to admin personnel only.
- D. The operator is trying to log into Cisco VSMC instead of Cisco VSOM.

Correct Answer: D
