QUESTION 1

Refer to the exhibit.

You just completed an upgrade of Cisco VSM from version 7.0 to 7.0.1 using the management console. You also want to change the network settings of this server during this upgrade, but the fields are greyed out. What is causing this issue?

A. The Cisco VSM services must be restarted before the network settings can be modified.

B. The server is a co-located deployment (Cisco VSOM + Cisco VSMS applications) and the network was configured using the operating system. Changes should also be made using the operating system.

C. The server is running the Cisco VSOM application and you should use the Cisco VSOM interface to change the network configurations.

D. The server is running the Cisco VSMS application and you should use the Cisco VSOM interface to change the network configurations.

Correct Answer: D

QUESTION 2

What is a possible cause for the motion detection feature not sending an email alert?

A. The SMTP server that the IP camera uses to send the email may be filtering emails to prevent spam from being sent through the server.

B. The SMTP server that the IP camera uses to send the email may not be filtering emails to prevent spam from being

sent through the server.

C. Sudden changes in light level or movement have accidentally triggered the motion detector, and the configuration needs to be modified.

D. The issue cannot be related to SMTP filtering, light levels, or movement.

Correct Answer: A

QUESTION 3

The branch security manager at a retail bank is asked to create a centralized surveillance solution using Cisco VSM. However, the WAN link between headquarters and some of the branches has limited bandwidth. Using Cisco VSM, flexibility of deployment is broad.

Which one of the options below is NOT possible?

A. Deploy a centralized VSM solution using H.264, instead of MJPEG encoding in branches with limited WAN speed

B. Retain camera streams on local branch servers, and only access video from headquarters on demand (such as an event or alarm video)

C. Configure cameras for H.264 encoding and 15 fps, store video locally on a server, then transcode the same video stream to 5 fps before sending it to the headquarters security center

D. Configure dual streaming on each camera--one for high-quality local recording, and the other for streaming to headquarters over WAN

E. Trigger remote viewing of live video stream only when the operator at headquarters requests it through VSOM

Correct Answer: C

QUESTION 4

What is the source of video feeds that flow to a workstation for viewing?

A. VSOM

B. VSVM

C. VSMS

D. First VSMS and then through the VSOM server

E. Direct from the camera to the workstation

Correct Answer: C

QUESTION 5

How many Cisco camera licenses are included with Cisco VSOM?

A. None. Even though they are no-cost part numbers, you still must order them separately depending on the number of cameras you plan to use.

B. 10000

C. 1000

D. No licenses are necessary for Cisco cameras.

Correct Answer: B
