- A. Ensures that the final design meets the business and technical requirements of the customer
- B. Helps to accelerate the implementation of an advanced technology
- C. Finalizes the location and number of pieces of equipment to be staged
- D. Helps reduce disruptions caused by unexpected events during network operations
- E. Helps the customer understand the overall costs to build and operate the network

Correct Answer: C

---

#### QUESTION 5

In the implement phase, staging involves installation and testing the customer's solution components in a non-production lab environment. Which of the following defines the benefit to the partner ?

- A. A Properly planned and executed Day 1 support plan improves the customer's and their end-users satisfaction with the implemented solution.
- B. Proper migration allows the customer to adopt the new hardware or software solution without an unacceptable disruption of their network services
- C. Staging validates that the system is operational to the customer and provides the customer with increased confidence in the implemented system.
- D. Staging validates the system and proactively identifies and resolves any network implementation issues. It demonstrates to the customers that the partner will deploy a quality network in an efficient manner and mitigates risk that the incorrect software or hardware is delivered to the installation site

Correct Answer: D
