QUESTION 1

HOTSPOT

You manage a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) stand-alone primary site. The deployment contains the servers configured as shown in the following table.

Server name	Configuration
Server1	Site server
Server2	Distribution point
Server3	SMS Provider
Server4	Reporting services point
Server5	Management point
Server6	Site database server

You are troubleshooting the hardware inventory flow from a Windows 8.1 computer named Client1. You need to verify whether the following events have occurred:

- The inventory files were uploaded from Client1.
- The inventory data was added to the site database.

Which log should you verify for each event? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

The inventory files were uploaded from Client1:

▼

Datatransferservice.log on Client1

Invproc.log on Server1

Mp_hinv.log Server5

The application event log on Server3

The inventory data was added to the site database:

▼

Datadr.log Server1

Datatransferservice.log on Client1

Invproc.log on Server1

Mp_hinv.log Server5

Correct Answer:

Answer Area

The inventory files were uploaded from Client1:

	▼
Datatransferservice.log on Client1	
Invproc.log on Server1	
Mp_hinv.log Server5	
The application event log on Server3	

The inventory data was added to the site database:

	▼
Datadr.log.Server1	
Datatransferservice.log on Client1	
Invproc.log on Server1	
Mp_hinv.log Server5	

*

Box 1:

MP_Hinv.log records details about the conversion of XML hardwareinventory records from clients and the copy of those files to the site server.

*

Box 2:

datadr.log records information about the processing of Management Information Format (MIF) files and hardware inventory in the Configuration Manager database.

Is placed on the site server.

QUESTION 2

DRAG DROP

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment.

You need to create a collection that excludes all of the client computers that have Microsoft Office 2013 installed.

Which four actions should you perform in sequence to create the query for the collection?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Select **is not** as the Operator.
- Display the estimated execution plan.
- Browse to the new query and select the query
- Create a query-based collection that uses the Sub Selected values option.
- Create a query that returns all of the client computers that have Office 2013 installed.
- Modify the query to use only indexed tables that are returned by the estimated execution plan.

Answer Area

Correct Answer:

Actions

-
- Display the estimated execution plan.
-
-
-
- Modify the query to use only indexed tables that are returned by the estimated execution plan.

Answer Area

- Create a query-based collection that uses the Sub Selected values option.
- Create a query that returns all of the client computers that have Office 2013 installed.
- Browse to the new query and select the query
- Select **is not** as the Operator.

QUESTION 3

DRAG DROP

Your network contains a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment.

You need to create a new report based on the report named All software companies. The new report must exclude a software company named Litware, Inc.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Edit the query.

Create a new report.

Clone the All software companies report.

Open the All software companies report for editing.

Copy the existing query from the dataset in Report Builder.

In Report Builder, paste the query to the dataset for the new report.

Answer Area

Correct Answer:

Actions

Clone the All software companies report.

Open the All software companies report for editing.

Answer Area

Copy the existing query from the dataset in Report Builder.

Create a new report.

In Report Builder, paste the query to the dataset for the new report.

Edit the query.

QUESTION 4

DRAG DROP

Your network contains a single Active Directory domain named contoso.com. System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) is deployed to contoso.com.

You have a Windows 8.1 operating system image named Image1 in Configuration Manager. Image1 has the data source of \\server1.contoso.com\source\Image1.wim. New client computers are deployed by using Image1.

You have an application named App1. App1 is a configuration utility that must be installed by using a Windows Installer (MSI) package.

You need to ensure that App1 is included in all future deployments of Image1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Refresh Image1.
- Install App1.exe.
- Deploy Image 1.
- Capture an image.
- Mount Image1.wim.
- Unmount Image1.wim.
- Schedule updates for Image1.
- Distribute the image to distribution points.

Answer Area

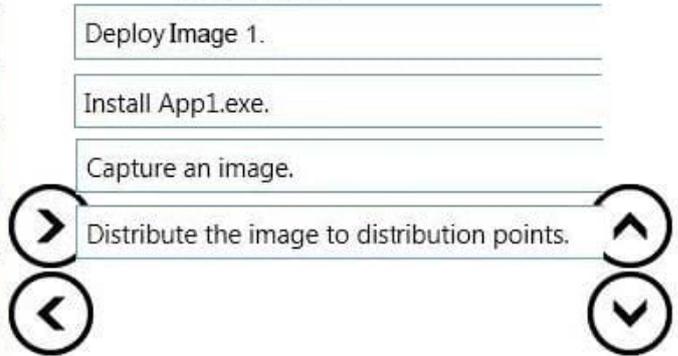

Correct Answer:

Actions

- Refresh Image1.
-
-
-
-
- Mount Image1.wim.
- Unmount Image1.wim.
- Schedule updates for Image1.
-
-

Answer Area

QUESTION 5

HOTSPOT

You manage a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) stand-alone primary site.

You have two line-of-business applications named App1 and App2. App1 is deployed by using a Configuration Manager application and is deployed to a computer collection that has the purpose set to Available. App2 is deployed by using a

Configuration Manager package and is deployed to a user collection that has the purpose set to Required.

You need to ensure that users will be able to install App1 and App2 by using the Application Catalog. The solution must minimize administrative effort.

In the table below, identify the action to perform for App1 and App2.

NOTE: Make only one selection on each column.

Hot Area:

Answer Area

Action	App1	App2
Redeploy the application and use a different purpose.	<input type="radio"/>	<input type="radio"/>
Redeploy the application and use a different target collection.	<input type="radio"/>	<input type="radio"/>
Recreate the application as a Configuration Manager package.	<input type="radio"/>	<input type="radio"/>
Recreate the application as a Configuration Manager application.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Action	App1	App2
Redeploy the application and use a different purpose.	<input type="radio"/>	<input checked="" type="radio"/>
Redeploy the application and use a different target collection.	<input checked="" type="radio"/>	<input type="radio"/>
Recreate the application as a Configuration Manager package.	<input type="radio"/>	<input type="radio"/>
Recreate the application as a Configuration Manager application.	<input type="radio"/>	<input type="radio"/>
