QUESTION 1

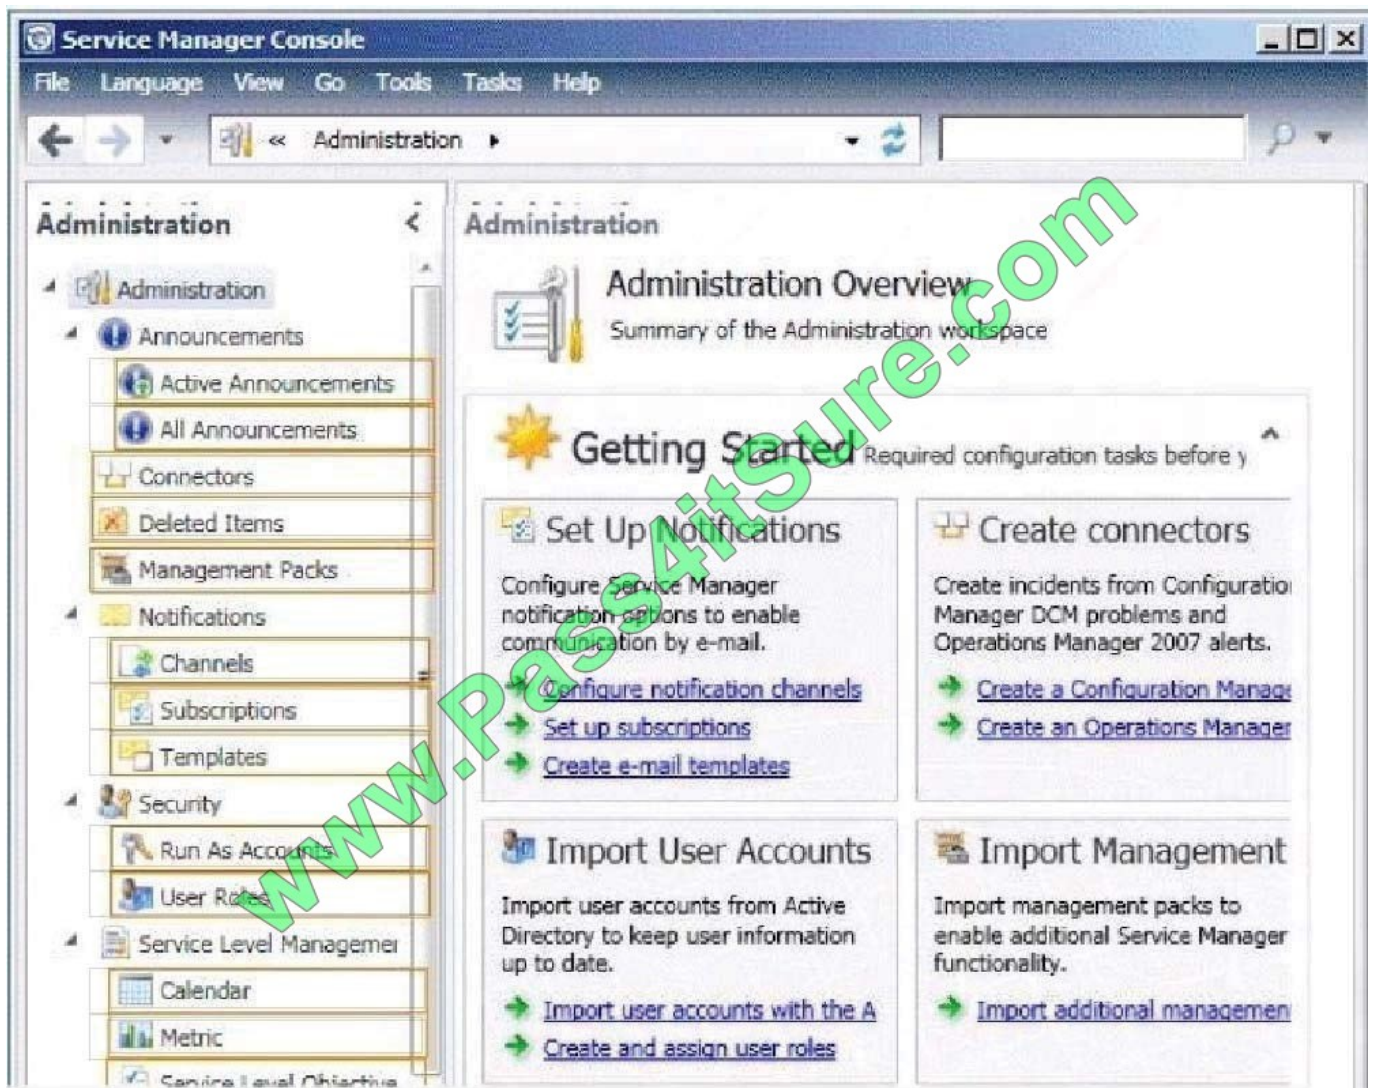

Your company uses System Center 2012 Service Manager to manage and track problems.

You need to ensure that a user named Admin1 is notified automatically when an incident is updated.

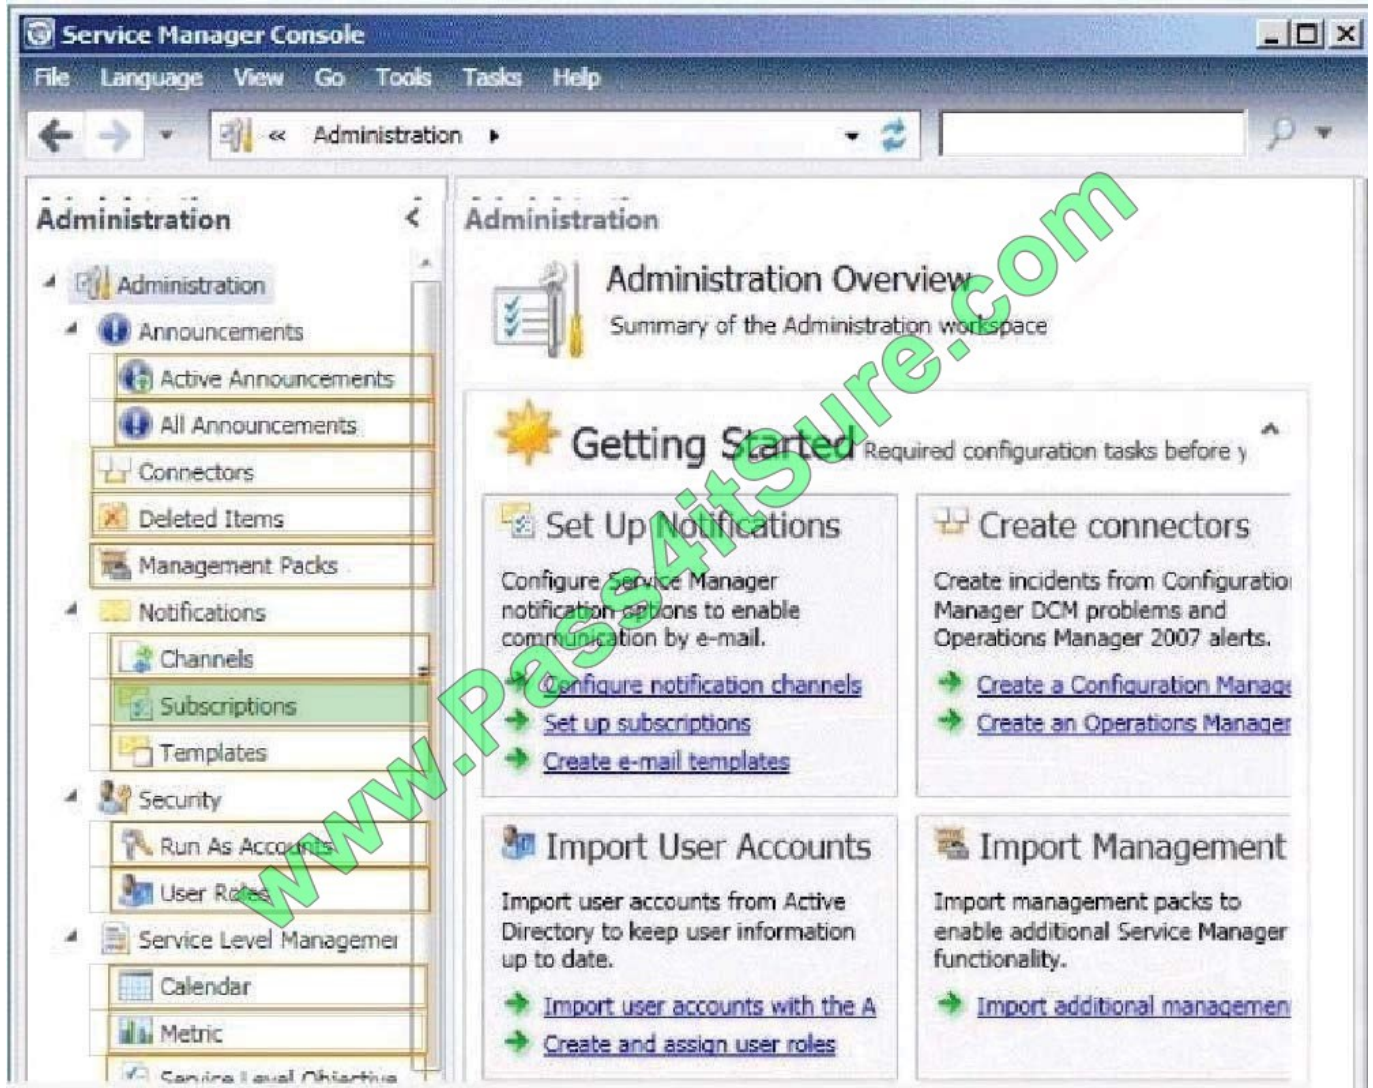

What should you configure?

To answer, select the appropriate category in the answer area.

Hot Area:

Correct Answer:

QUESTION 2

You plan to automate a task by using System Center 2012 Orchestrator.

You create a new runbook that uses multiple input parameters and invokes a nested runbook.

You need to verify that the runbook executes successfully.

Which three actions should you perform in sequence?

(To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Provide the input parameters.	
Check out the runbook.	
Start the runbook from the Runbook Tester.	
Start the runbook from the System Center 2012 Orchestrator Runbook Designer.	
Start the runbook from the Runbook Orchestrator Web Console.	
Check in the runbook.	

Correct Answer:

Actions	Answer Area
	Check out the runbook.
	Start the runbook from the Runbook Tester.
	Provide the input parameters.
Start the runbook from the System Center 2012 Orchestrator Runbook Designer.	
Start the runbook from the Runbook Orchestrator Web Console.	
Check in the runbook.	

QUESTION 3

Which tasks should you recommend performing in Orchestrator, Service Manager and Operations Manager? (To answer, select the appropriate task for each

Answer Area

Operations Manager:

Orchestrator:

Service Manager:

product in the answer area.)

Hot Area:

Operations Manager:

- Create a runbook.
- Delegate permissions.
- Create a recovery task.
- Create a service offering.
- Create an override in a management pack.

Orchestrator:

- Create a runbook.
- Delegate permissions.
- Create a recovery task.
- Create a service offering.
- Create an override in a management pack.

Service Manager:

- Create a runbook.
- Delegate permissions.
- Create a recovery task.
- Create a service offering.
- Create an override in a management pack.

Correct Answer:

Operations Manager:

- Create a runbook.
- Delegate permissions.
- Create a recovery task.
- Create a service offering.
- Create an override in a management pack.

Orchestrator:

- Create a runbook.
- Delegate permissions.
- Create a recovery task.
- Create a service offering.
- Create an override in a management pack.

Service Manager:

- Create a runbook.
- Delegate permissions.
- Create a recovery task.
- Create a service offering.
- Create an override in a management pack.

QUESTION 4

You need to implement the planned integration of Configuration Manager and VMM.

You install Configuration Manager and create a collection that includes all of the Hyper-V hosts. Which four additional actions should you perform in sequence?

(To answer, move the appropriate four actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Add a distribution point to Configuration Manager.	
Configure the update server to allow configuration changes.	
Add a software update point to Configuration Manager.	
Add an update server to VMM.	
Deploy a Windows Server Update Services (WSUS) server to the network.	

Correct Answer:

Actions	Answer Area
Add a distribution point to Configuration Manager.	Deploy a Windows Server Update Services (WSUS) server to the network.
	Add an update server to VMM.
	Configure the update server to allow configuration changes.
	Add a software update point to Configuration Manager.

QUESTION 5

You need to recommend a solution to meet the update requirement for the Hyper-V hosts. What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. System Center 2012 Orchestrator runbooks
- B. VMM update baselines
- C. System Center 2012 Service Manager workflows
- D. Configuration Manager auto deployment rules

Correct Answer: B
