### QUESTION 1

You need to configure SharePoint to remove user account-related data. Which Windows PowerShell cmdlet should you run?

- A. Enable-SPTimerJob
- B. Disable-SPTimerJob
- C. Start-SPTimerJob
- D. Set-SPTimerJob
- E. Get-SPTimerJob

Correct Answer: D

---

### QUESTION 2

You need to configure the environment for confidential documents.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Answer Area	
Activate the policy feature.	
Associate the policy feature with a document library.	
In the Site Collection Policies Gallery, create a policy feature.	
In Central Administration, create a security policy feature.	
Associate the content type with a document library.	
Associate the policy feature with the restricted content type.	

Correct Answer:

Answer Area	
	In the Site Collection Policies Gallery, create a policy feature.
Associate the policy feature with a document library.	Associate the policy feature with the restricted content type.
	Activate the policy feature.
In Central Administration, create a security policy feature.	
Associate the content type with a document library.	

Box 1: In the Site Collection Policies Gallery, create a policy feature.

Box 2: Associate the policy feature with a restricted content type.

Box 3: Activate the policy feature.

Note:

\* From scenario: Changes to confidential documents must be logged.

\* Policy features are implemented as programs that run on SharePoint Server 2013. They can be enabled and configured by a server administrator and, when they

are enabled, they can be used by site administrators to define policies.

\* To implement a policy, associate it with content types, libraries, or lists in sites.

\* The top-level site of a site collection includes a Site Collection Policies gallery where administrators of the top-level site can create new policies. After creating a

Site Collection policy, you can export it so that administrators of other site collections can import it into their Site Collection Policies galleries. This lets you

standardize policies across your organization.

\* You can associate a policy with a library, list, or content type in the following ways:

- A) Associate policy features with a Site Collection policy and then associate that policy with a content type or with a list or library.
- B) Associate a set of policy features directly with a content type, and then add that content type to one or more lists or libraries.
- C) Associate a set of policy features directly with a list or library.

---

### QUESTION 3

You are configuring DNS for SharePoint Online.

You need to create the appropriate type of DNS record.

Which type of DNS record should you create?

- A. A DNS CNAME record pointing to sharepoint.contoso.com.
- B. A DNS CNAME record pointing to contoso.sharepoint.com.
- C. A DNS A record pointing to the IP address of the SharePoint Online servers.
- D. A DNS TXT record containing an Office 365 validation code.

Correct Answer: B

---

### QUESTION 4

You administer a SharePoint environment for Contoso, Ltd. that has multiple web applications and six service applications. Each web application uses a different set of service applications. You create a service application proxy group named

Contoso.

You need to add the service applications to the Contoso proxy group.

What should you do?

- A. On the Configure Service Application Associations page in Central Administration, add the services to the proxy group.
- B. Run the following Windows PowerShell commands:  
`New-SPServiceApplicationProxyGroup "Contoso" Add-SPServiceApplicationProxyGroupMember "Contoso" -Member`
- C. Run the following Windows PowerShell command:  
`New-SPStateServiceApplicationProxy -Name "Contoso" -ServiceApplication`
- D. On the Configure Service Connections page in Central Administration, create a new Service Application Proxy group. Add the services to the new proxy group.
- E. Run the following Windows PowerShell command:  
`Add-SPServiceApplicationProxyGroupMember "Default" -Member`

Correct Answer: B

---

#### QUESTION 5

A company is planning to deploy My Sites to its 25,000 employees. The company will maintain dedicated content databases for the storage of personal site collections.

You need to create the minimum number of content databases required to support the My Sites.

What should you do?

- A. Create three content databases. Set the value of the WarningSiteCount property of each content database to 10,000.
- B. Create one content database. Set the value of the WarningSiteCount property of the content database to 25,000.
- C. Create one content database. Set the value of the MaxSiteCount property of the content database to 25,000.
- D. Create three content databases. Set the value of the MaxSiteCount property of each content database to 10,000.
- E. Create five content databases. Set the value of the WarningSiteCount property of each content database to 5,000.
- F. Create five content databases. Set the value of the MaxSiteCount property of each content database to 5,000.

Correct Answer: D
