### QUESTION 1

You need to ensure that content authors can publish the specified files.

What should you do?

- A. Create multiple authoring site collections. Create a site that contains lists, document libraries, and a Pages library. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.
- B. Create multiple authoring site collections. Create a site that contains lists, document libraries, and a Pages library. Create an asset library in the authoring site collection, and enable anonymous access to the library on the authoring web application.
- C. Create one authoring site collection. Create a site that contains multiple lists, document libraries, and Pages libraries. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.
- D. Create multiple authoring site collections. Create a site that contains multiple lists, document libraries, and Pages libraries. Create an asset library in a new site collection, and enable anonymous access to the library on the publishing web application.

Correct Answer: B

---

### QUESTION 2

A company has a single Active Directory Domain Services (AD DS) forest that contains two domains named tailspintoys.com and wingtip toys.com. The company has a SharePoint environment in the tailspintoys.com domain.

You need to ensure that SharePoint search services use SharePoint managed accounts.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Configure the SharePoint Server Search service to use the Account1 account.	
Register Account1 as a SharePoint managed account.	
Create an account named Account1 in the tailspintoys.com domain.	
Create an account named Account1 in the wingtiptoys.com domain.	
Configure the SharePoint Foundation Search service to use the Account1 account.	

Correct Answer:

	Answer Area
	Create an account named Account1 in the tailspintoys.com domain.
	Register Account1 as a SharePoint managed account.
	Configure the SharePoint Server Search service to use the Account1 account.
Create an account named Account1 in the wingtiptoys.com domain.	
Configure the SharePoint Foundation Search service to use the Account1 account.	

Explanation/Reference:

Box 1: Create an account named Account1 in the tailspintoys.com domain.

Box 2: Register Account1 as a SharePoint managed account.

Box 3: Configure the SharePoint Server Search service to use the Account1 account.

Note:

\* Make the account in the SharePoint domain.

\* Step 1: Create accounts that are required for a SharePoint Search service application To register a managed account

1. On the Central Administration home page, in the Quick Launch, click Security.
2. On the Security page, in the General Security section, click Configure managed accounts.
3. On the Managed Accounts page, click Register Managed Account.
4. On the Register Managed Account page, in the Account Registration section, type the user name and password that you want to use as credentials for the service account.
5. If you want SharePoint Server 2013 to manage password changes for this account, select the Enable automatic password change check box and configure the parameters for automatic password change.
6. Click OK.

Step 2: Configure the SharePoint Search service

Reference: Create and configure a Search service application in SharePoint Server 2013

---

### QUESTION 3

You need to resolve the authentication issue that occurs in the SharePoint environment. What should you do?

- A. Remove the Network Load Balancing feature from all of the servers.
- B. Set the NLB client affinity to Single.
- C. Deploy the Secure Store Service.
- D. Use classic mode authentication and set the authentication type to NTLM.

Correct Answer: B

---

### QUESTION 4

Contoso, Ltd., has an on-premises SharePoint 2013 implementation. It plans to migrate the sales department to SharePoint Online. Additional departments will be migrated in the future.

The sales department currently has a dedicated site collection for collaboration and document sharing.

The sales department site collection uses the managed path <https://sales.contoso.com>. Contoso's SharePoint Online environment is accessible by using the URL <https://contoso.sharepoint.com>.

Sales team employees must be able to connect to SharePoint Online by using a simple managed path.

You need to configure SharePoint Online.

Which managed path should you use?

- A. <https://sales.contoso.com>
- B. <https://contoso-my.sharepoint.com>
- C. <https://contoso.sharepoint.com/sites/sales/>
- D. <https://teams.contoso.com/sites/sales/>

Correct Answer: C

Define managed paths in SharePoint Server 2013 An explicitly named path (for example, <http://server/sites/team>) is used for a single site collection. In this case the managed path would be <https://contoso.sharepoint.com/sites/sales/> as SharePoint online uses <https://contoso.sharepoint.com> and we want to provide a managed path for the Sales department's site collection.

### QUESTION 5

You are the SharePoint administrator for a SharePoint 2013 deployment.

You need to configure accounts.

What should you do? To answer, drag the appropriate permission to the correct action. Each permission may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

#### Permissions

- Full Control
- Manage Profiles
- Manage Audiences
- Manage Permissions
- Retrieve People Data for Search Crawlers
- Manage Social Data

#### Answer Area

Action	Permission
Gives an account the ability to manage social tags and notes for all users	Permission
Gives an account the ability to configure the service application	Permission
Gives an account the ability to read profiles and their properties	Permission
Gives an account the ability to add, delete, or edit profiles through the User Profile Application	Permission

Correct Answer:

**Permissions**

Manage Audiences
Manage Permissions

**Answer Area**

Action	Permission
Gives an account the ability to manage social tags and notes for all users	Manage Social Data
Gives an account the ability to configure the service application	Full Control
Gives an account the ability to read profiles and their properties	Retrieve People Data for Search Crawlers
Gives an account the ability to add, delete, or edit profiles through the User Profile Application	Manage Profiles

- \* Manage Social Data - This level will give a user the ability to manage social tags and notes for all users.
- \* Full Control - This level will give a user the ability to configure the Service Application and all the pieces of it.
- \* Retrieve People Data for Search Crawlers - This level will give a user the ability to read profiles and there properties
- \* Manage Profiles - This level will give a user account the ability to Add, Delete, or Edit permissions thru the User Profile Application.
