QUESTION 1

A SharePoint deployment includes the content source described in the following table.

Content source	URL	Crawl frequency requirement
Intranet site	http://intranet.contoso.com	When a new document or page is added

You need to configure the intranet site content source to return search results without impacting availability.

What should you do?

- A. Add an additional index server to the farm.
- B. Reset the search index.
- C. Configure continuous crawling.
- D. Configure an incremental crawl to run every day.
- E. Configure an incremental crawl to run every 30 minutes.
- F. Configure on-demand crawling.

Correct Answer: C

QUESTION 2

DRAG DROP

You are the administrator for your company's SharePoint environment.

Company policy requires that you implement social and collaboration features.

You need to select the type of site to build for each business scenario.

What should you do? To answer, drag the appropriate site type to the correct scenario. Each site may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Solutions	Answer Area	
	Scenario	Solution
Communities	Individual users store and share documents and information.	Solution
Team sites	Teams work on specific tasks that have a finite life cycle.	Solution
Project sites	Distinct groups of users collaborate and store information common to them such as documents and calendars.	Solution
My Sites	Large groups of users participate in sharing knowledge.	Solution

Correct Answer:

Solutions	Answer Area	
	Scenario	Solution
	Individual users store and share documents and information.	My Sites
	Teams work on specific tasks that have a finite life cycle.	Project sites
	Distinct groups of users collaborate and store information common to them such as documents and calendars.	Team sites
	Large groups of users participate in sharing knowledge.	Communities

QUESTION 3

You plan to deploy SharePoint Server 2013 to your enterprise organization's multi-farm configuration.

A dedicated enterprise services farm will be created to host shared service applications. Two collaboration farms will be created to host collaboration sites.

All users must be able to perform the following tasks:

Aggregate tasks from different site collections.

Automatically translate pages to different languages.

Classify documents by using an enterprise taxonomy.

View Microsoft Excel files rendered in the web browser of the users.

You need to identify which service applications to deploy to each farm.

What should you identify? (To answer, drag the appropriate service applications to the correct farms. Each service application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Service Applications	Answer Area
Excel Services Application	Enterprise farm: Service application
Machine Translation Service	Service application
Managed Metadata Service	Collaboration farm: Service application
Work Management Service	Service application

Correct Answer:

Service Applications	Answer Area
	Enterprise farm: Machine Translation Service
	Managed Metadata Service
	Collaboration farm: Excel Services Application
	Work Management Service

QUESTION 4

You need to meet the database backup requirements.

What should you do? (To answer, drag the appropriate terms to the correct location or locations in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.)

Select and Place:

Answer Area

In SQL Server Management Studio, expand the folder. Right-click **Maintenance Plans** and then choose **Maintenance Plan Wizard**. Create a new job schedule that runs . Select and define a maintenance plan.

backup
daily
database shrink
Databases
Management
one-time
recurring
Server Objects
weekly

Correct Answer:

Answer Area

In SQL Server Management Studio, expand the **Management** folder. Right-click **Maintenance Plans** and then choose **Maintenance Plan Wizard**. Create a new **recurring** job schedule that runs **daily**. Select and define a **backup** maintenance plan.

database shrink
Databases
one-time
Server Objects
weekly

QUESTION 5

You are configuring a SharePoint farm in an environment that includes Microsoft Exchange Server 2013. You need to ensure that specified SharePoint users can search the Exchange mailboxes of all employees, place holds on mailbox data, and export mailbox data.

What should you do first?

A. Create an external content type for Exchange mailbox information.

- B. Configure server-to-server authentication between SharePoint and Exchange.
- C. Create an external list for Exchange mailbox information.
- D. Configure forms-based authentication between SharePoint and Exchange.

Correct Answer: B
