### QUESTION 1

You have a SharePoint Server 2013 server farm.

You implement Business Connectivity Services (BCS). You need to ensure that the BCS data is available for search.

What should you configure?

- A. A result source
- B. A content source
- C. A search scope
- D. A crawl rule

Correct Answer: B

### QUESTION 2

You are planning the deployment of a SharePoint Server 2013 server farm.

Replica name	Replica configuration
SQLReplica1	SQLReplica1 is the primary replica.
SQLReplica2	SQLReplica2 is used for high-availability and is installed in the same data center as SQLReplica1.
SQLReplica3	SQLReplica3 is used for disaster recovery purposes and is installed in a remote location.
SQLReplica4	SQLReplica4 is used for reporting purpose. Failure of this replica must not affect the SharePoint Server 2013 deployment.

You plan to deploy Microsoft SQL Server 2012 AlwaysOn Availability Groups. The groups will have four replicas configured as shown in the following table.

You need to recommend which mode of commit must be used for each replica.

Which commit type should you recommend for each replica? (To answer, select the appropriate options in the answer area.)

Hot Area:

**Answer Area**

SQLReplica2: 

Asynchronous commit	<input type="checkbox"/>
Synchronous commit	<input type="checkbox"/>

SQLReplica3: 

Asynchronous commit	<input type="checkbox"/>
Synchronous commit	<input type="checkbox"/>

SQLReplica4: 

Asynchronous commit	<input type="checkbox"/>
Synchronous commit	<input type="checkbox"/>

Correct Answer:

**Answer Area**

SQLReplica2: 

Asynchronous commit	<input checked="" type="checkbox"/>
Synchronous commit	<input type="checkbox"/>

SQLReplica3: 

Asynchronous commit	<input checked="" type="checkbox"/>
Synchronous commit	<input type="checkbox"/>

SQLReplica4: 

Asynchronous commit	<input checked="" type="checkbox"/>
Synchronous commit	<input type="checkbox"/>

**QUESTION 3**

An organization has an Active Directory Domain Services (AD DS) domain and a SharePoint intranet site.

You need to ensure that only members of the AD DS security group named Managers can create personal sites.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Run the SharePoint 2013 Product Configuration wizard.	
Configure user permissions for the User Profile service application.	
Sign in to Central Administration.	
Manage permissions for the Secure Store service application.	
Configure site app permissions for the intranet site collection.	
Manage settings for the User Profile service application.	
Sign in to the intranet site collection.	

Correct Answer:

	Answer Area
Run the SharePoint 2013 Product Configuration wizard.	Sign in to Central Administration.
	Manage settings for the User Profile service application.
	Configure user permissions for the User Profile service application.
Manage permissions for the Secure Store service application.	
Configure site app permissions for the intranet site collection.	
Sign in to the intranet site collection.	

#### QUESTION 4

An organization is involved in a legal case related to one of its products. All documents related to this product are stored in a subsite of a site collection. The site collection has an existing policy to delete documents that have not been modified

for four years.

You must protect the data that is relevant to the case without impacting other content, changing file locations, or duplicating files.

You need to configure SharePoint to ensure that relevant documents are NOT deleted by existing or future expiration policies.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
Perform an eDiscovery search for product information and export results to a records center.	
Define a hold.	
Enable in-place records management.	
Declare all product documentation files as in-place records.	
Perform an eDiscovery search for product information and place items on hold.	
Define a retention policy on the document content type.	
Enable the Hold site feature.	

Correct Answer:

Answer Area	
Perform an eDiscovery search for product information and export results to a records center.	Enable the Hold site feature.
	Define a hold.
Enable in-place records management.	Perform an eDiscovery search for product information and place items on hold.
Declare all product documentation files as in-place records.	
Define a retention policy on the document content type.	

**QUESTION 5**

You are a SharePoint administrator at Litware, Inc. A Business Data Connectivity service application has recently been deployed.

Users report that they cannot create external lists that contain the external content types, and they receive the following error message when they try to open existing external lists: "Access Denied by Business Data Connectivity".

You need to configure the minimum permissions required so that users can create external lists and read data in external lists.

On the Set Object Permissions page, which permissions should you select? (To answer, select the appropriate permissions in the answer area.)

Hot Area:

LITWARE\dbReaders\_AdventureWorks

To remove an account, or group, select it above and click 'Remove'.

Remove

Permissions for LITWARE\dbReaders\_AdventureWorks:
