QUESTION 1

You have a Skype for Business Server 2015 infrastructure. You have a Virtual Desktop Infrastructure (VDI) that uses Hyper-V.

You use VDI templates based on Windows 8.1. All thin clients run Windows 8.1. Each thin client has a Skype for Business-qualified headset.

You need to prepare all of the thin clients and all of the VDI templates so that users can place calls by using the headset.

Which components should you install on the thin clients and the VDI templates? To answer, drag the appropriate components to the correct location in the answer area. Each component may be used once, more than once, or not at all.

Additionally, you may need to drag the split bar between panes or scroll to view content. Each correct answer is worth one point.

Select and Place:

Components	Answer Area
Skype for Business Phone Edition	Thin clients: Component
Skype for Business	Thin clients: Component
Skype for Business VDI plug-in	VDI templates: Component
Windows 8 RDS client	

Correct Answer:

Components	Answer Area
Skype for Business Phone Edition	Thin clients: Windows 8 RDS client
	Thin clients: Skype for Business VDI plug-in
	VDI templates: Skype for Business

QUESTION 2

You have a Skype for Business Server 2015 infrastructure.

You plan to configure Exchange Online to host voice mail.

You need to perform the following actions:

Configure the hosted voice mail policy.

Set the external access number for the voice mail.

Enable a user for Unified Messaging (UM).

Configure the Contact object used for the hosted voice mail.

Define a Unified Messaging (UM) IP gateway.

Where should you perform each action? To answer, select the appropriate environment for each task in the answer area

Hot Area:

Answer Area

Configure the hosted voice mail policy.

	▼
Skype for Business Server 2015	
Exchange Online	

Set the external access number for the voice mail.

	▼
Skype for Business Server 2015	
Exchange Online	

Enable a user for Unified Messaging (UM).

	▼
Skype for Business Server 2015	
Exchange Online	

Configure the Contact object used for the hosted voice mail.

	▼
Skype for Business Server 2015	
Exchange Online	

Define a Unified Messaging (UM) IP gateway.

	▼
Skype for Business Server 2015	
Exchange Online	

Correct Answer:

Answer Area

Configure the hosted voice mail policy.

	▼
Skype for Business Server 2015	
Exchange Online	

Set the external access number for the voice mail.

	▼
Skype for Business Server 2015	
Exchange Online	

Enable a user for Unified Messaging (UM).

	▼
Skype for Business Server 2015	
Exchange Online	

Configure the Contact object used for the hosted voice mail.

	▼
Skype for Business Server 2015	
Exchange Online	

Define a Unified Messaging (UM) IP gateway.

	▼
Skype for Business Server 2015	
Exchange Online	

QUESTION 3

Your network has a perimeter network and an internal network. A firewall named Firewall1 separates the perimeter network from the Internet. A firewall named Firewall2 separates the internal network from the perimeter network.

You have a Skype for Business Server 2015 infrastructure that contains an Edge Server and a reverse proxy server in the perimeter network.

You plan to deploy extensible messaging and presence protocol (XMPP) federation.

You need to create the firewall rules for the planned deployment.

How should you configure each firewall? To answer, configure the appropriate rules in the dialog box in the answer area.

Hot Area:

Answer Area

Firewall name	Allowed Port	Destination
Firewall1	<input type="text"/> 5061 5062 5269 23456	<input type="text"/> External interface of the Edge Server Internal interface of the Edge Server External interface of the reverse proxy server Internal interface of the reverse proxy server
Firewall2	<input type="text"/> 5061 5062 5269 23456	<input type="text"/> External interface of the Edge Server Internal interface of the Edge Server External interface of the reverse proxy server

Correct Answer:

Answer Area

Firewall name	Allowed Port	Destination
Firewall1	<input type="text"/> 5061 5062 5269 23456	<input type="text"/> External interface of the Edge Server Internal interface of the Edge Server External interface of the reverse proxy server Internal interface of the reverse proxy server
Firewall2	<input type="text"/> 5061 5062 5269 23456	<input type="text"/> External interface of the Edge Server Internal interface of the Edge Server External interface of the reverse proxy server

QUESTION 4

Trey Research currently leverages Exchange Online to provide voice mail capabilities for their existing IP-PBX. An Exchange Online Unified Messaging (UM) dial plan with type of E.164 Uniform Resource Identifier (URI) is currently in use.

Skype for Business Server 2015 is already deployed and integrated with Exchange Online. Users can see presence in Outlook Web App and schedule Skype meetings from Outlook Web App.

Trey Research is deploying Skype for Business Server 2015 Enterprise Voice and would like to retain voice mail capabilities in Exchange Online.

You need to enable voice mail for Enterprise Voice users.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Steps to perform in sequence

- Create Exchange Online UM dial plan.
- Modify Exchange Online UM dial plan.
- Modify UM settings on users' Exchange mailbox.
- Delete Exchange Online UM dial plan.
- Disable UM on users' Exchange mailbox.
- Enable UM on users' Exchange mailbox.

Correct Answer:

Actions

Steps to perform in sequence

- Create Exchange Online UM dial plan.
-
-
- Delete Exchange Online UM dial plan.
- Disable UM on users' Exchange mailbox.
-
-

QUESTION 5

You need to enable all users for voice mail.

Which three configuration steps are required to configure the environment for Exchange Unified Messaging? Each correct answer presents part of the solution.

- A. Run the OcsUMUtil executable on the Skype for Business server.
- B. Run ExchUCUtil.ps1 on the Exchange server.
- C. Run the New-CsHostingProvider Skype for Business Management Shell cmdlet.
- D. Run the New-CsHostedVoicemailPolicy Skype for Business Management Shell cmdlet.
- E. Apply the hosted voice mail policy to all users.

Correct Answer: ABD
